Celebrate Man On The Moon With Walter Cronkite:

Captured by Aliens Joel Achenbach, 2003 The great minds of the human race employing ever more fabulous technology have peered into the depths of space and discovered that we exist on a tiny speck in a universe that is vast beyond comprehension But there is one thing we have yet to discover a single scrap of extraterrestrial life We have heard no signals found no alien picnic trash The aliens who allegedly abduct people in the middle of the night have a strange way of evaporating in the harsh glare of scientific scrutiny And so at the turn of the millennium we are in an intellectual fix we know the universe only through its structure its physical properties its chemistry Of its biology we can only guess Are there creatures out there like us with big brains and restless spirits Or are we for all intents and purposes alone If aliens exist if there really are intelligent creatures zooming around the galaxy then where in tar nation are they Washington Post reporter Joel Achenbach the author of *Why Things Are* and a commentator for National Public Radio puts the ET debate into the context of the space program discoveries in astronomy and the hunger for meaning and spiritual nourishment in an era when science often doesn't provide the answers that people desire He finds that the topic of extraterrestrial life is poisoned by wishful thinking by the natural human yearning to make contact with our brothers and sisters in space But he also finds some fascinating admirable and maddening characters who have pursued the truth about extraterrestrial life Carl Sagan the brilliant astronomer who brought the cosmos to the masses Dan Goldin the cantankerous head of NASA who still believes in the dream of the Space Age Henry Harris a former Las Vegas lounge singer who is assigned the job of figuring out how to get a spaceship to Alpha Centauri and various and sundry ufologists experiencers spiritualists and channelers for whom the aliens are an ever present reality In this fascinating funny and spirited book Achenbach discovers that the search for life elsewhere leads us on a looping road back to the fundamental questions about life on Earth To think coherently about extraterrestrial life we first must come to terms with who we are why we exist and what it means to carry around in our cells an evolutionary history that took four billion years to unfold Achenbach's message is that it is a wonderful and thrilling thing to be a sentient human being a creature capable of foolish romanticism in a universe that is mostly rocks and gas and dust and empty space

Space Chronicles Neil deGrasse Tyson, 2013-03-04 A compelling appeal at just the right time for continuing to look up Air Space America's space program is at a turning point After decades of global primacy NASA has ended the space shuttle program cutting off its access to space No astronauts will be launched in an American craft from American soil until the 2020s and NASA may soon find itself eclipsed by other countries' space programs With his signature wit and thought provoking insights Neil deGrasse Tyson one of our foremost thinkers on all things space illuminates the past present and future of space exploration and brilliantly reminds us why NASA matters now as much as ever As Tyson reveals exploring the space frontier can profoundly enrich many aspects of our daily lives from education systems and the economy to national security and morale For America to maintain its status as a global leader and a technological innovator he

explains we must regain our enthusiasm and curiosity about what lies beyond our world Provocative humorous and wonderfully readable Space Chronicles represents the best of Tyson s recent commentary including a must read prologue on NASA and partisan politics Reflecting on topics that range from scientific literacy to space travel missteps Tyson gives us an urgent clear eyed and ultimately inspiring vision for the future **The Great G.O.A.T.
