achievement in the sciences While the focus of Science for Girls is on science education information about current research in the area of female learning styles in general is also presented Furthermore the author is careful to point out that the strategies suggested will not only benefit female students but also their male counterparts Containing current research lesson plans and learning strategies and resources in science education this book will be of benefit for classroom teachers parents and most importantly the students they are teaching

Junior High School Library Catalog, 1997 *Aspiring and Inspiring* Rebecca Garcia, Pamela E. Harris, Dandrielle Lewis, Shanise Walker, 2023-07-26 *Aspiring and Inspiring* is a collection of essays from successful women and gender minority mathematicians on what it takes to build a career in mathematics The individual essays are intended to advise encourage and inspire mathematicians throughout different stages of their careers Themes emerge as these prominent individuals describe how they managed to persist and rise to positions of leadership in a field which can still be forbidding to many We read repeatedly that individual mentorship matters that networks of support can be critical and that finding fulfillment can mean formulating one's own definition of success Those who aspire to leadership in the field will find much useful advice here The cumulative power of the collection carries a strong impact The glass ceiling is very real in mathematics and is the result of cultural and sociological factors at work in our community The book makes clear that we won't achieve equality of opportunity merely by exhorting those who are often excluded to change their behaviors and their goals The need for systemic cultural change is vividly at times painfully evident in these stories As Dr Erica Graham says in

her powerful and moving essay we need a different kind of academy and we ll only get it by working for it We can start by reading this book and recognizing the kind of academy we currently have Developing Mathematically Promising Students Linda Jensen Sheffield,1999 Developing mathematically promising students *Books for the Teen Age, 2001* New York Public Library.
