With just four required items 1 This all inclusive book with simple terms teaches you how to use a sextant navigate and includes all celestial data needed till the year 2056 2 sextant 3 compass and 4 universal time shortwave radio or time piece you can navigate the globe by using latitude and longitude derived from the sun with these four items and have peace of mind knowing that you have a reliable backup to GPS Once you have your position in latitude and longitude this book teaches you basic navigation destination heading and distance so you will never be lost For safety reasons and because equipment fails batteries die and equipment falls overboard people going to sea should have at least two different methods of navigation The preferred primary method is using a GPS system This book will teach a secondary backup method of my version of the Noon Shot Fix If you are headed offshore just curious about celestial navigation or have an old sextant and wonder how it works buy this book with the other required items and you won't be disappointed This book can be read in a short amount of time with sextant readings starting immediately This book is a combination of basic theory teaching only what you need for a noon shot fix and basic navigation plotting along with a checklist type form to calculate your position all inclusive celestial data many completed examples and information on emergency navigation There are many other great celestial navigation techniques out there that people use every day however many of these techniques require more dedication to learn use My goal was to create a simple book that could be used by the average person with no background on the subject and contain all the information needed that could be called on in a time of emergency Anyone with basic math skills can learn use this technique **Practical Navigation** W. S. Kals, 1972 Simple Celestial Chris Kreitlein, 2014-03-21 Simple Celestial is an instructional manual on the art of celestial navigation The manual is clear succinct and thorough in presenting in a simple style the process of observing the Sun Moon planets and stars used in celestial navigation in order to derive a position fix anywhere in the world The process of celestial navigation as presented in the manual uses an assumed position to derive an intercept that is the basis for a line of position from the heavenly body Additionally the manual explains the alternate method of observing the Sun at local apparent noon for a position fix Using either method and with the appropriate supporting tools the student will find the manual an excellent guide in completing the sight reduction form to arrive at a solution The manual deliberately relegates theory to a small chapter in the back concentrating rather on the practical aspects of celestial navigation **Noon Sight Navigation** Arthur A. Birney, 1972 **Primer of Celestial Navigation** John Favill, 2007-03-01
