The Platinum Workforce Trond Arne Undheim, 2025-11-25 Artificial intelligence is already causing a major shift in the nature of work Countries colleges or employers are not prepared to continuously train billions of knowledge workers to compete in this new economic reality But that s not all More change is coming due to the polycrisis of pressing challenges such as sustainability social inequality and geopolitical instability Figuring out what career paths skills and talents we need to nurture has never been more urgent especially for those who aspire to leadership In The Platinum Workforce futurist and technologist Trond

Arne Undheim reveals how to be a changemaker in the ongoing re industrial transition Industrial principles such as lean manufacturing technological advancement and production at scale meet significant sustainability challenges increased risks and intricate inequality concerns from the Global South as well as from workers in advanced societies who also feel left behind Undheim has spent the last decade examining the technologies risks and trends shaping the future of work Helping startups shaping governance policies teaching students and building educational programs he has found that there are two core skills and ten complementary skills that will define both individual and collective success in the future of work The core skills are deft human AI collaboration and an innate interoperability mindset but teams together mastering the ten complementary skills eco awareness maker skills mediation skills megascale operations mobility risk aptitude R D hacks psycho resilience sociotechnical finesse and systems thinking is what will define future leadership Leading the 21st century workplace will require unprecedented levels of human AI collaboration But evolving new forms of augmented intelligence will not be easy We all have to train for it constantly adapting to new interfaces and watching out for risks that could derail progress or create new problems But the challenge does not stop there Tackling the cascading effects of evolving hazards requires astute risk management Transdisciplinary skills such as an entrepreneurial approach megascale execution ability and socio technical skills will need to be constantly honed Leaders and workers alike need to develop an interoperability mindset Success requires adapting to and helping others adapt to the fundamental shifts in the materials methods tools and technologies fueling the intricate cultural machine we call society No matter our degrees experiences resources or current skill sets to compete in this new world we need a reset

Tasks Versus Skills: Squaring the Circle of Work with Artificial Intelligence Marc Steven Ramos, 2024-12-22 For the past few years employee development has seen a significant rise or focus unique to skills skilling and modernizing companies into a Skills Based Organization or SBO The goal is to advance new methods to identify gaps in knowledge and ability new approaches to fill skills gaps and sustain at scale programs to ensure gaps are addressed with some level of predictability There is however a proportional dilemma Developing skills is certainly a non negotiable This is mandatory to stay competitive and healthy and protect or future proof individuals and enterprises The dilemma regards an internal over reliance on a skills first mindset as a somewhat dominant charter This is often fueled by external vendor influence industry analysts and in some cases propaganda or fear not to miss the skills boat What s missing is acknowledging the proportional value of tasks quantifiable tasks with the complementary value of skills and qualified skills

The Skill Code Matt Beane, 2024-06-11 From one of the world s top researchers on work and technology comes an insightful and surprising guide to protecting your skill in a world filling with AI and robots Think of your most valuable skill the thing you can reliably do under pressure to deliver results How did you learn it Whatever your job plumber attorney teacher surgeon decades of research show that you achieved mastery by working with someone who knew more than you did Formal learning school and books gave you conceptual knowledge but you developed

your skill by working with an expert Today this essential bond is under threat In our grail like quest to optimize productivity with intelligent technologies like AI and robots we are separating junior workers from experts in workplaces around the world It s a looming multi trillion dollar problem that few are addressing until now In The Skill Code researcher and technologist Matt Beane reveals the hidden code that underwrites every successful expert novice relationship Beane has spent the last decade examining this unique bond in a variety of settings from warehouses to surgical suites He s found that just as the four amino acids are the building blocks of DNA the three C s challenge complexity and connection are the basic components of how we develop our most valuable skills Whether you re an expert or a novice this book will show you how to build skill more effectively and how to make intelligent technologies part of the solution not the problem The Skill Code is an insightful must read with significant implications for how we will work and build skill in the twenty first century a guide to help you not only survive but thrive

The Implications of new Technology, particularly Artificial intelligence (AI) for International Politics Malam Wasai,2023-09-18 Submitted Assignment from the year 2023 in the subject Politics General and Theories of International Politics language English abstract Greater scrutiny is necessary because AI will have a significant impact on international relations such as putting new topics on the international agenda challenging geostrategic relations serving as a tool for diplomats and negotiators and creating new opportunities and concerns about protecting human rights Scholars and diplomats have found it helpful to think about the different things that affect international relations by breaking them down into three levels of analysis individual state and international State level analysis examines the foreign policy behavior of states in terms of state characteristics For example some scholars say that all democracies behave a certain way they don t fight with other democracies Artificial intelligence impact governance As AI continues to evolve and permeate various aspects of our lives its implications for AI and how does it impact businesses AI artificial intelligence refers to machines that can perceive intelligence synthesize and infer information It is the science and engineering of intelligent machines that can mimic human intelligence to perform tasks and then on the information they collect improve themselves based AI is designed to significantly enhance human capabilities and contributions making it a valuable business asset
