AI-Mediated Language Education in the Metaverse Era Yu-Ju Lan, Grace Yue Qi, Dorothy Chun, 2025-10-13 This book provides open discussions and dialogues around the latest research and development on applying AI and ubiquitous technologies into various language learning contexts Living in the Metaverse era arguably a turning point in the evolution of the Internet it is vital for researchers and practitioners to rethink and reconsider human and AI relationships in transforming the way we teach learn and live in everyday life Reinders et al 2022 amongst Computer Assisted Language Learning CALL researchers have emphasised the need to conduct more research on language learning in the classroom and beyond that makes real connections with what language learners do for their learning today More importantly language educators must find ways to support language learning in this new era What is urgently needed is a consolidation and synthesis of theoretical foundations

visions and the latest research findings and practices on the integration of AI and ubiquitous technologies and language education from diverse perspectives This book comprising of contributions regarding contextualised AI mediated language learning and teaching provides researchers practitioners and teacher educators with an opportunity to closely engage in research informed practices and intellectual dialogues on potential opportunities and challenges in the Metaverse era It also helps to facilitate the development of equitable sustainable and just practices for the diversity of language learners today

Conceptual Modeling Dominik Bork,Roman Lukyanenko,Shazia Sadiq,Ladjel Bellatreche,Oscar Pastor,2025-11-19 This book constitutes the proceedings of the 44th International Conference on Conceptual Modeling ER 2025 which took place in Poitiers France during October 20 23 2025 The 22 full papers included in this book were carefully reviewed and selected from 106 submissions The ER conference is providing a forum for the presentation discussion and debate of innovative and emerging ideas concepts and methods They create an environment that encourages experimentation interdisciplinary exchange and the exploration of new research frontiers

Optimal Physical Activity across the Lifespan for People of All Abilities Ronald F. Zernicke ,David Arthur Hart, Humans evolved to be mobile within the boundary conditions of Earth and many biological and physiologic systems depend on mechanical loading to maintain integrity during growth and maturation during skeletal maturity and during the aging process These systems subscribe to the use it or lose it principle and thus require continual use to maintain integrity Given that premise considerable basic and clinical research efforts have been directed at optimizing the effectiveness and positive impact of exercise on sports performance and the well being of those with intact systems However those with disabilities or compromised abilities also benefit from exercise protocols and there exists a need to focus attention on these populations as well Given the myriad of biological and physiological systems that benefit from exercise and mechanical loading there is a need for all humans of varying abilities to not only maintain the integrity of their health but to attempt to optimize it recognizing that optimizing each person s health across the stages of the life cycle may require different exercise protocols dependent on stage of life sex genetics and other individualized variables For those with physical disabilities embracing and maintaining such exercise protocols may be challenging but expanded research translation of findings and integration of the outcomes into everyday life to enhance the health and well being of this significant population are needed going forward
