Travel Behaviour Reconsidered in an Era of Decarbonisation David Metz, 2024-08-27 The transport system is central to our lives as our means to travel but also has major impact on our environment This has become most salient in recent years through its contribution to climate change However this perspective has only had a minor impact on the conventional economic analysis and modelling of transport investments creating a dissonance between the traditional objectives of investment and the strategic need to reduce carbon emissions to Net Zero by 2050 *Travel Behaviour Reconsidered in an Era of Decarbonisation* argues that our transport networks are mature and the objective should be to improve operational efficiency Over the past half century large public expenditures in roads and railways were justified by an analytic approach to the benefits of investment primarily the value of the time saved through faster travel to both business and non business users of the networks However average travel time has not changed over this period People have taken the benefit of faster travel as better access to people places activities and services with the ensuing enhanced opportunities and choices This book argues that the basis of orthodox transport economic analysis has been misconceived and a fresh perspective on economic analysis is now needed

Implications of Remote Work on Employee Well-being and Health Rolf Van Dick, Anja Baethge, Nina M. Junker, 2024-12-31 The rapidly growing field of organizational psychology has over the last few years become one of the fastest growing branches of psychology Particularly taking care of the health and well being of employees in the workplace cannot only be considered a moral imperative but has begun globally to be recognised as driving forces of socio economic growth Employee health and well being is crucial to organizations in regards to improved productivity employee performance job satisfaction staff retention reduced absenteeism increased job satisfaction and work commitment Thus research relating to employee well being and health has produced some significant results and furthered our understanding of this subsection of the organizational psychology field The evolvement of the way we work has also gained traction in the organizational psychology field in relation to remote working Since the Covid 19 pandemic many workforces have adapted more or less permanently to this form of working Frontiers has organized a series of Research Topics to highlight the latest advancements in research across the field of organizational psychology and the implications of remote working This editorial initiative of particular relevance led by Professor Rolf van
