Lloyd's Register Technical Association Session 1987-1988 Lloyd's Register Foundation, 1987-01-01 The Lloyd's Register Technical Association LRTA was established in 1920 with the primary objective of sharing technical expertise and knowledge within Lloyd's Register. Publications have consistently been released on a yearly basis with a brief interruption between 1938 and 1946. These publications serve as a key reference point for best practices and were initially reserved for internal use to maximise LR's competitive advantage. Today the LRTA takes a fresh approach focusing on collaboration by combining professional expertise from across LRF Group to ensure a frequent output of fresh perspectives and relevant content. The LRTA has evolved into a Group-wide initiative that identifies, captures and shares knowledge spanning various business streams and functions. To support this modern approach, the LRTA has adopted a new structure featuring representatives and senior governance across the business streams and the LR Foundation. The Lloyd's Register Technical Association Papers should be seen as historical documents representing earlier viewpoints and are not reflective of current thinking and perspectives by the current LR Technical Association. The Lloyd's Register Staff Association LRSA changed its name to the Lloyd's Register Technical Association LRTA in 1973. *Proceedings of International Conference on AI Systems and Sustainable Technologies* Anubha Jain, Zdzislaw Polkowski, Rosalina Babo, Navneet Sharma, 2025-12-02 This book includes high quality research papers presented at the International Conference on AI Systems and Sustainable Technologies ASSET 2025 organized by the Department of Computer Science and Information Technology School of CS and IT at IIS deemed to be University Jaipur India during 28-29 March 2025. It assembled more than 300 researchers and practitioners in the fields of technology, philosophy, history of ideas, literature, linguistics, social science, etc. It was an initiative from the Swedish Center for Working Life based on the project AI Based Systems and the Future of Language. Knowledge and Responsibility in Professions within the COST 13 programme of the European Commission. Participants in the conference or in some cases researchers related to its aims were chosen to contribute to this book. It was preceded by *Knowledge, Skill and Artificial Intelligence* ed B Göransson and L Josefson Springer Verlag London 1988 and will be followed by *Dialogue and Technology* ed M Florin and B Göransson Springer Verlag London 1990. The contributors' thinking in this field varies greatly so do their styles of writing. For example, contributors have varied in their choice of he or she for the third person. No distinction is intended but chapters have been left with the original usage to avoid extensive changes. Similarly, individual contributors' preferences as to notes or references lists have been followed. We want to thank our researcher Satinder P Gill for excellent work with summaries and indexes and Sandi
