**Healthcare Transformation using Artificial Intelligence** Robert JT Morris,2025-07-25 Healthcare Transformation

Using Artificial Intelligence provides insights into executing healthcare transformation through AI and deploying health technology at scale. It focuses on improving patient outcomes while managing costs, highlighting selected use of AI and contrasting it with a tech push approach. Through interactions with leading clinicians and healthcare administrators, this book presents the most urgent challenges facing patients such as lifestyle self-empowerment, adherence, knowledge, and behavior change, and clinicians including information overload, time scarcity, rapidly changing guidelines, care quality, and administrative burdens. The book explains recent AI breakthroughs and critically evaluates their promise, showing how AI can be successfully deployed to address these challenges. Real deployments, scaling, and evidence gathering illustrate the best bets for AI in healthcare. Innovation is moving fast, but patient safety, clinical trials, and regulatory approvals ensure appropriate adoption. This resource is valuable for health professionals, scientists, researchers, practitioners, and students wishing to expand their knowledge in this field. Chronicles the healthcare system's problems along with the most promising transformational AI techniques that can be used. Describes data science and AI technologies and why or when they work, including examples and references. Gives simple and understandable descriptions in each application area of how the technologies actually work. Includes examples and case studies of applying AI to achieve better patient outcomes while lowering costs.

Advancing the Science of Environmental Justice in the International Wildlife Trade Jamie K.

Reaser, Nicholas King, Gunārs Hauff Platais, Ines Arroyo-Quiroz, Meredith L. Gore, Isla Kirkey, 2025-06-03. The Smithsonian Institution has offered to cover the publication costs of most if not all of the papers accepted for this Research Topic. There is a need to conceptualize an environmental justice framework that informs regulation of the international wildlife trade to minimize species endangerment and infectious disease risks while also affording environmental justice to communities, nations, species, and ecological systems entwined in the commerce pathway. This Research Topic is dedicated to advancing the science of environmental justice in the international wildlife trade from both problems and solutions perspectives. We welcome manuscripts relevant to legal and/or illegal aspects of the international wildlife trade. Submissions must be of a scholarly nature and framed from a social sciences perspective, although interdisciplinary work is encouraged. The international wildlife trade has been recognized as one of the greatest threats to biodiversity as well as a facilitator of zoonotic disease transmission with pandemic potential. This has led to increased calls for regulation of this megabillion-year industry, ranging from comprehensive bans to risk-based strategies that are species, product, and/or geography specific. Every aspect of wildlife commerce and every proposed risk mitigation measure has implications for environmental justice, yet environmental justice has not been mainstreamed in the scientific inquiry, policy, nor planning processes relative to the international wildlife trade. Because wildlife trade has diverse drivers and purposes as well as different levels of legality, social legitimacy, and enforcement, there is an urgent need to understand the environmental justice issues tied to consumer demand vs. supply provision along the trade chain, including how this is influenced by economic, cultural, and geographic

biases An understanding of environmental justice patterns and trends is necessary for the design and support of effective regulatory frameworks that manage risks in actuality rather than merely in concept Determining where and how to permit and support legal and sustainable wildlife trade versus where it should be more tightly regulated or even cease requires at least as much understanding of the human animal as it does the wildlife species A greater understanding of the political economy of the illegal aspects of the international wildlife trade from an environmental justice perspective can also open new vistas of green criminological inquiry Ecological citizenship and environmental justice are central themes in green criminology highly relevant to the wildlife trade They recognize justice as central to the right to be protected from harm whether that is one on one harm institutionalized harm or harm arising from human actions that affect climates and environments on a global scale The recognition of such rights in trade regulation is scant and more likely overshadowed by a desire to protect the economic value of a good rather than the inherent value of the wild animal being consumed We will prioritize papers that use social science approaches tools to empirically investigate aspects of environmental justice in the international wildlife trade Manuscripts should be framed so as to facilitate development of an environmental justice framework that informs regulation of the international wildlife trade to minimize species endangerment and infectious disease risks while also affording environmental justice to communities nations and ecological systems entwined in the commerce pathway We welcome manuscripts relevant to legal and or illegal aspects of the international wildlife trade Submissions must be of a scholarly nature we will not accept advocacy documents The following manuscript types will also be considered if the contributions are sufficiently innovative transformative 1 Case studies of environmental justice problems resolutions in the international wildlife trade context 2 Models for advancing the science of environmental justice in the international wildlife trade context 3 Analyses of international wildlife trade law policy frameworks with a view toward integrating environmental justice issues as rooted in scholarly science All papers should emphasize conservation goals outcomes Direct inquiries about other manuscript themes types to Dr Jamie K Reaser at [Reaserjk@si.edu](mailto:Reaserjk@si.edu) This Research Topic was developed in collaboration with the IUCN Commission on Education and Communication <https://www.iucn.org/our-union/commissions/commission-education-and-communication> and the International Alliance Against Health Risks in the Wildlife Trade <https://alliance.health.wildlife.org>

**Future Titans** Daniel Idresne, Jaida Sahin, Hissam Effendi, Ethan Castro, 2021-08-28 I could not just sit around during this famine of Inspiration Aspirations in the Gen Z community I decided to write an Actionable Inspirational book with some of my friends from one of the smartest schools in America A book FOR TEENS BY TEENS Credibility in Relatability If you are a teen looking to improve yourself those around you this is for you If you are a parent or teacher and you want to help kids but don t know how here you go This book was written during the Covid 19 Pandemic so I doubt it gets any more recent relevant realistic than this Instead of waiting to get a degree or be qualified to write a book I thought it would be more efficient to write one while I look like act like and sound like my target readers instead of being detached and trying to relate The goal for readers after reading this is to have more clarity intent urgency motivation independence and understanding when going through life Teenagers typically wander around inhaling

exhaling waiting for something to trigger them to be adults or self sufficient human beings well I think this can play that part The goal is for every single teenager to be able to and actually take something away from this and apply it regardless of their current financial situation what school they go to their past their present their perceived future their external circumstances their internal circumstances or whatever else I want to play a part in making as many Future Titans as I possibly can

hopefully this acts as a positive contribution towards that goal Cheers my fellow soon to be Titans
