Advancing the Frontiers of Education. Science and Technology in Nigeria Olukoya Ogen, Bankole Faloye, 2025-07-23. Document from the year 2025 in the subject Education. Reading Instruction language: English. Abstract: The book *Expanding the Frontiers of Education: Science and Technology in Nigeria* explores the transformative impact of digital technologies on learning, scientific discovery, and technological advancement. With 67 painstakingly peer-reviewed chapters, the book delves into how technologies are reshaping traditional educational models, driving scientific innovation, and creating new opportunities for progress in a rapidly evolving digital landscape. The volume is more than a collection of academic essays; it offers a holistic view of how knowledge can be harnessed for societal transformation, reflecting the depth and breadth of Professor Adeoluwa's scholarly legacy.

Professor Bayode POPOOLA, Vice Chancellor, Adeyemi Federal University of Education, Ondo.

This monumental edited collection is a fitting tribute to Professor Adeoluwa's exceptional scholarship and administrative prowess. It underscores the critical need for integrating digital technologies with human-centered approaches and highlights the value of cross-disciplinary collaboration while addressing the ethical dimensions of technological advancement. The book offers a comprehensive roadmap for navigating the complexities and opportunities of the digital age. It provides essential insights for educators, scientists, technologists, policy makers, and all those interested in shaping the future of learning, research, and innovation.

Prof. Ibiyinka OGUNLADE, Deputy Vice Chancellor, Academic, Ekiti State University, Ado Ekiti, 2014.

2016 _____ A rich and elegant multidisciplinary collection of essays that explores the transformative potential of education science and technology in shaping Nigeria's future. The book delves into the challenges and opportunities presented by the evolving educational landscape, the critical role of science and technology in national development, and strategies for bridging gaps in access, quality, and innovation. It further analyzes how digital tools and platforms can revolutionize learning experiences and improve access to quality education. Most significantly, this book is laced with insightful recommendations for policymakers, educators, researchers, and anyone interested in the development of Nigeria.

Prof. Abubakar Sadiq HARUNA, Director, Institute of Africa Higher Education Research and Innovations, Maryam Abacha American University of Nigeria, Kano.

Advanced Research on Computers in Education Robert Lewis, Setsuko Ōtsuki, 1991. In the field of education, advanced research using artificial intelligence and cognitive models is vividly making its appearance, clear and deepening our conviction of its effectiveness in practical use. This volume is one of the results of the conference which was held with the aim of exploring the current state and future trends of advanced techniques and methodologies in information processing, specifically those from artificial intelligence and cognitive science as applied to the field of education.

Hypermedia Courseware: Structures of Communication and Intelligent Help Armando Oliveira, 1992-12-14. This book is based on the NATO Advanced Research Workshop on Structures of Communication and Intelligent Help for Hypermedia Courseware, which was held at Espinho, Portugal, April 19-24, 1990. The texts included here should not be regarded as untouched proceedings of this meeting but as the result of the reflections which took place there and which led the authors to revise their texts in that light. The Espinho ARW was itself to some extent the continuation of the ARW on Designing Hypermedia Hypertext for Learning, held in Germany in 1989. D. H. Jonassen, H. Mandl, eds. Designing Hypermedia for Learning. NATO ASI Series F Vol. 67. Springer, 1990. At that meeting, an essential conclusion became apparent: the importance and interest of hypermedia products as potential pedagogical tools. It was then already predictable that the enormous evolution of hypermedia would lead to its association with multimedia technologies, namely for the production of courseware. Parallel to the improvement of the didactic potential and quality, which results from this association, it nevertheless brought along a natural array of difficulties, some old, some new, in the conception and use of hypermedia products. Today, there is agreement that one of the most promising technological advances for education is represented by the use of text, sound, and images based on nonlinear techniques of information handling and searching of hypermedia architectures. The problem of hypermedia is fundamentally one of communication; this leads to an attempt at defining a language for hypermedia.

Computer Mediated Education of Information Technology Professionals and Advanced End-users B. Z. Barta, John Eccleston, Rudolf Hambusch, 1993. This publication explores the swift technical advancements that have been achieved in information technology in the educational arena. A short period has seen not only the development of concepts, principles, and approaches but the implementation of some on a large scale and the readiness of others for use and

dissemination Their capabilities and prospects are considered here in depth and indications are given of directions for future progression A broad range of theoretical and implementation oriented papers is augmented by discussions of specialized subjects plus key note papers highlighting the cooperative efforts of European countries to develop advanced technology based learning systems
