Advanced Machine Learning with Evolutionary and Metaheuristic Techniques Jayaraman Valadi,Krishna Pratap Singh,Muneendra Ojha,Patrick Siarry,2024-04-22 This book delves into practical implementation of evolutionary and metaheuristic algorithms to advance the capacity of machine learning The readers can gain insight into the capabilities of data driven evolutionary optimization in materials mechanics and optimize your learning algorithms for maximum efficiency Or unlock the strategies behind hyperparameter optimization to enhance your transfer learning algorithms yielding remarkable outcomes Or embark on an illuminating journey through evolutionary techniques designed for constructing deep learning frameworks The book also introduces an intelligent RPL attack detection system tailored for IoT networks Explore a promising avenue of optimization by fusing Particle Swarm Optimization with Reinforcement Learning It uncovers the indispensable role of metaheuristics in supervised machine learning algorithms Ultimately this book bridges the realms of evolutionary dynamic optimization and machine learning paving the way for pioneering innovations in the field

The Power of Ideas Zhiyi Liu,2022-12-08 As the first academic monograph that a Chinese scholar discusses the histories of thoughts and ideas related to the development of digital economics this book aims to make research from the perspective of the history of ideas and discuss the ideas influencing the development of digital economics and the evolution of related theories and thoughts with the methodology of interdisciplinary research The human society is in the stage of major historic transition and enters the digital world with the main goal of developing the artificial world In this world the development of digital economics is significantly characterized by the deep interaction between the real and the virtual worlds while the key triggering this paradigm reform is the evolution of ideas since the modern times While involving the field of computer these thoughts are also related to the fields of philosophy ethics communication and economics Therefore

the results of the research on the history of ideas related to digital economics are required to really understand the depth of this discipline. If computationalism is the most important paradigm evolution of natural science, the most important paradigm evolution of social science is interdisciplinary complex science. In the meantime, this book is the most significant in understanding the nature of paradigm evolution related to the development of digital economics from the perspective of complex science and interdisciplinary systematic researches. Digital economics is in the foundation laying phase while this book mainly aims to historically narrate the thoughts of this discipline and hopes that readers can understand the influence of ideas in the old era on shaping the disciplines in the new era while exploring this new discipline. The construction of digital economics is a process of evolution. This book will be helpful to understand the underlying logic of the ideas constructed by the thinkers in different fields.

Innovations and Advanced Techniques in Computer and Information Sciences and Engineering Tarek Sobh, 2007-09-04. Innovations and Advanced Techniques in Computer and Information Sciences and Engineering includes a set of rigorously reviewed world class manuscripts addressing and detailing state of the art research projects in the areas of Computer Science, Computer Engineering and Information Sciences. Innovations and Advanced Techniques in Computer and Information Sciences and Engineering includes selected papers from the conference proceedings of the International Conference on Systems Computing Sciences and Software Engineering SCSS 2006 which was part of the International Joint Conferences on Computer Information and Systems Sciences and Engineering CISSE 2006. All aspects of the conference were managed on line not only the reviewing submissions and registration processes but also the actual conference. Conference participants, authors, presenters and attendees only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground breaking conference. The on line structure of this high quality event allowed academic professionals and industry participants to contribute work and attend world class technical presentations based on rigorously refereed submissions live without the need for investing significant travel funds or time out of the office. Suffice to say that CISSE received submissions from more than 70 countries for whose researchers this opportunity presented a much more affordable dynamic and well planned event to attend and submit their work to versus a classic on the ground conference. The CISSE conference audio room provided superb audio even over low speed internet connections, the ability to display PowerPoint presentations and cross platform compatibility; the conferencing software runs on Windows, Mac and any other operating system that supports Java. In addition, the conferencing system allowed for an unlimited number of participants which in turn granted CISSE the opportunity to allow all participants to attend all presentations as opposed to limiting the number of available seats for each session.

ECAI 2004 Ramon López de Mántaras, Lorenza Saitta, 2004. This is the Golden Age for Artificial Intelligence. The world is becoming increasingly automated and wired together. This also increases the opportunities for AI to help people and commerce. Almost every sub field of AI had now been used in substantial applications. Some of the fields highlighted in this

publication are CBR Technology Model Based Systems Data Mining and Natural Language Techniques Not only does this publication show the activities capabilities and accomplishments of the sub fields it also focuses on what is happening across the field as a whole
