The Power of Agentic AI: Redefining Human Life and Decision-Making C. Kishor Kumar Reddy, Shenson Joseph, Herat Joshi, Srinath Doss, Mariya Ouaisa, 2025-09-26 This book explores how autonomous AI systems are reshaping human decision making across various industries and society The book delves into the concept of Agentic AI AI systems that can act independently and make decisions without human intervention Unlike existing literature that speculates about superintelligent systems this book offers practical insights into how current AI systems are already transforming sectors like health care finance and law It highlights the growing impact of these technologies on professional roles and governance offering a balanced view of both the opportunities and challenges presented by AI autonomy The book's findings show that Agentic AI enhances decision making by improving efficiency

accuracy and scalability. However, it also presents ethical concerns related to accountability, transparency, and the shifting nature of human responsibility in AI-mediated environments. It emphasizes the need for robust ethical frameworks and governance structures to ensure that AI systems align with human values. By focusing on real-world applications and current AI technologies, the book provides actionable insights for decision makers, helping businesses, policymakers, and technologists navigate the evolving AI landscape. It offers a roadmap for understanding the present-day capabilities of autonomous systems and prepares professionals for the ethical and operational challenges of integrating these technologies. Readers will gain a comprehensive understanding of how Agentic AI is poised to redefine human life and decision making, making it essential for anyone interested in the future of technology, ethics, and innovation. Unlike traditional AI, which typically requires human supervision or input, Agentic AI introduces the concept of autonomy: AI systems that can act, learn, and make decisions independently. This paradigm shift challenges the conventional human-centered approach to decision making, positioning AI as a true partner in complex cognitive tasks. The book also explores the ethical and societal implications of AI autonomy in ways that extend beyond typical discussions.

The ASEAN Digital Economy Paul Cheung, Xie Taojun, 2023-08-15. Boasting the fastest growing Internet market in the world, the Association of Southeast Asian Nations (ASEAN) is accelerating into the digital economy. This book assesses the potential economic impact of digital economy agreements (DEAs) and the readiness of some ASEAN member states to grow the digital economy in collaboration. The book presents a novel framework to assess countries' readiness to enter digital economy collaborations following the architecture of Singapore's DEAs with its trading partners. It takes a bird's-eye view of the digital economy in ASEAN and reviews the current state of digital infrastructure and regulations. The book also includes simulation exercises to project economic outcomes delivered by regional collaborations. It also elaborates on the specific strengths and weaknesses of five ASEAN member states. These ASEAN member states include Indonesia, Malaysia, the Philippines, Vietnam, and Cambodia. The book concludes by revisiting the ASEAN economy as a whole. It points out key issues country leaders need to work on as they proceed with digital economy collaborations. This book is written for scholars, policymakers, and industrial practitioners who wish to learn the latest developments in the ASEAN digital economy.
