Next Level Website Design Greg Merrilees,2020-03 Discover what it takes to convert more of your website visitors into hot leads and paying customers in a highly competitive online world in the 2020s decade Nobody wants to come across as a sleazy desperate salesperson Cold calling and discounting is the old way of selling and quite frankly It s the bloody hard way The new way of selling is to have your website do the heavy lifting for you so you can expect more qualified people to be attracted to your business instead of you having to chase them After designed and transforming around 2000 websites landing pages for many businesses including some high profile marketers and brands across a range of industries I realized there is a recurring pattern for success and it s NOT rocket science It all comes down to 3 essential overarching principles that are designed to build trust on your website and if you successfully apply what you learn in this book you will be able to

boost your website's conversion rate which ultimately means a boost in your revenue. When it comes to your website, if it's not designed with the principles you will discover in this book, it can have some serious consequences on your business. You could have a low amount of new leads coming in, a low amount of sales, and trampoline-like bounce rates because people aren't engaged with your website. It takes a lot more than just good-looking design to transform your website into a 24/7 marketing machine. This book is not about website coding, SEO, or any of that tech stuff. Instead, this book will show you website design principles and strategies to show you how to attract paying customers to your business without having to cold call or hard sell. If you're a service business, e-commerce business, SaaS business, consultant, coach, course creator, marketing agency, or even website design business, don't let your website be the reason people don't buy from you. Instead, read this book to discover what it takes to take your website to the next level.

Multimodal RAG in Action: A Developer's Guide to Building Reliable AI Agents with Text, Image, and Knowledge Graph Retrieval

What if your AI agent could answer the hardest questions not just by searching documents but by reading diagrams, connecting graphs, and piecing together evidence from every corner of your data? Imagine building assistants that don't get stumped by visuals, don't hallucinate facts, and always show their work. That's the new standard. The real challenge: how do you get there as a developer? *Multimodal RAG in Action* is the essential playbook for engineers who want more than another text-only chatbot. It shows you how to architect, code, and optimize production-grade Retrieval-Augmented Generation (RAG) systems that search, reason, and explain using text, images, and structured knowledge graphs the same way experts do. With this hands-on guide, you'll master the workflows and frameworks that leading AI teams use to build explainable, trustworthy, and adaptable agents. Go far beyond simple document QA and step into the real world of multimodal retrieval where insights hide in diagrams, charts, and relational data as often as in paragraphs. Inside, you'll learn how to combine state-of-the-art embedding models like CLIP, MiniLM, and Node2Vec for seamless cross-modal search. Assemble fast, scalable pipelines with LangChain, LlamaIndex, Pinecone, Chroma, and FAISS. Engineer hybrid retrievers and fusion logic to surface the right evidence every time. Craft prompts that guarantee every answer is supported, cited, and ready for audit. Troubleshoot, evaluate, and refine your agents with industry benchmarks and best practices. Handle the realities of scaling, latency, cost, versioning, and data privacy. Apply practical patterns for compliance, monitoring, and agentic workflows. Whether you're building enterprise assistants, research copilots, or regulatory tools, this book delivers the battle-tested strategies and sample code you need to succeed. If you're ready to create AI agents that don't just answer but prove and win user trust in every domain, *Multimodal RAG in Action* is your blueprint. Level up your AI engineering. Build agents that see, retrieve, and reason with everything. Get your copy now and take your projects further.
