Minefields Scott M. Shemwell, 2025-06-13 Volumes have been written on the need for high quality data to support organizational decision making Most of those books appear to focus on the development and sustainment of data from the standpoint of those directly responsible for the management of data stores and the use of technology necessary to acquire store and secure data sets *Navigating the Data Minefields Management's Guide to Better Decision Making* provides executives and subject matter experts SMEs with a reasonable set of useful tools they can adapt to their specific organization and operating environment While complexity can never be taken out of an integrated system decision making can be facilitated by using metrics that take into consideration the quality of the data used to make decisions i.e. risk mitigation Professionals who depend on large high quality data sets such as senior and mid level management engineering SMEs data scientists IT systems engineers and medical professionals will want to have this book in their decision making arsenal

Contestation in Prism Flavia Lucenti, Cecilia Ducci, Carmen Wunderlich, Jeffrey S. Lantis, 2025-04-30 This book analyses the complex dynamics of international norm contestation and explores how norms adapt and withstand challenges in different settings Examining the interplay between various types of contestation norm robustness and the resilience of norm clusters it sheds light on what the authors define as contestation in prism The book thus presents norm contestation as a multifaceted process with far reaching implications In this context it further discusses different conceptions of contestation ranging from reactive vs proactive contestation and applicatory vs validity contestation to inadvertent i.e. interpretive vs deliberate contestation It then develops a theoretical model that links contestation in prism with studies of norm clusters or norms that are embedded in broader normative structures and interwoven with other normative meanings Based on a strong

theoretical framing the book presents in depth analyses of norm contestation in areas such as regional organizations nuclear non proliferation norms relating to atrocities and international criminal law Offering multifaceted perspectives on norm evolutions and their implications this contribution will appeal to students scholars and researchers of international relations and related disciplines as well as policy makers interested in a better understanding of contestation and norm cluster resiliency
