Visions of Artificial Intelligence Stefan Raß, 2021-03-30 Master s Thesis from the year 2019 in the subject Computer Sciences Artificial Intelligence grade 1 University of Vienna language English abstract Artificial Intelligence AI is often considered to be one of the defining technologies which will be important in shaping the prosperity and power dynamics of the twenty first century In the last five years many governments around the world tried to implement policies that are intended to foster AI innovation in order to position themselves as leaders in a space that is thought to be the next global paradigm shift Europe and the United States are thought leaders in this field and have published policy documents aimed at deliberating the future progress of AI and defining national policies or research strategies which should serve as

signposts for subsequent decisions Research in Science Technology Society STS studies has shown how sociotechnical imaginaries shape the ways emerging technologies are assessed evaluated and regulated in differing political cultures They inform the visions that make certain options possible specific outcomes plausible and leave other avenues for policy dormant This thesis explores these imaginaries found in policy documents connected to regulatory attitudes towards AI and the social changes linked to this emerging technology in the United States and Europe along three dimensions First the dominant visions images and ideals associated with the technological innovation in AI Second the expectations of benefits and risks projected onto AI And third the imagined role of governance of AI in the policy documents as well as how society is imagined to be part of the assessment development and regulation The thesis suggests that AI offers a new and rich window into regulatory imaginaries in a specific moment of technological emergence Some of the uncovered attitudes towards AI are reflected in imaginaries connected to previous technologies however AI constitutes a novel moment of emergence that links to unique attitudes to regulating self learning algorithmic intelligence

Evaluating the Effects of Artificial Intelligence on Complexity in Marketing ,2021-03-30 Bachelor Thesis from the year 2018 in the subject Business economics Offline Marketing and Online Marketing grade 1.9 Reutlingen University ESB Business School language English abstract The research question explored in this paper is about a potential benefit of AI in marketing which to this day is comparatively unexplored Even though the concept of AI has been around since the 1950s and current research and development make significant progress in this area scientific literature dealing with AI in marketing consists of less than 300 published articles This paper distinguishes itself from related papers as it goes beyond investigating whether AI has an impact on business or not The results of this thesis shall not only show the potential AI holds for marketing but also suggest constant theoretical exploration of untapped fields in marketing The Internet of things IoT and big data changed customer behavior and how businesses work This trend has led to a continued increase in complexity for marketing managers In 2017 8.4 billion devices were connected to the internet This number is forecasted to increase to 20.4 billion by 2020 The immense amount of data generated collected and analyzed has propelled new markets such as big data and artificial intelligence Marketing managers struggle to keep up with the sheer volume of data available and the surging complexity of marketing Connecting dispersed data and finding patterns leads to helpful insights which are said to reduce complexity Many businesses lack a clear strategy to tap into the benefits of AI and gain a competitive advantage

Algorithms ,2003 Traditional Dwellings and Settlements Review ,2006 **Exploring the Digital Domain** Ken Abernethy, J. Thomas Allen, 2004 With Ken Abernethy and Tom Allen s fresh approach to the introductory computing course students develop the skills to understand create work and communicate using digital media and networks Excitement builds via the book and the accompanying Web site as students discover the worlds of image processing digital sound web publishing and much more The organizing theme for the book is that the computer is not merely a tool but rather itself a medium for representing storing manipulating and communicating different forms of information text numbers graphics images sounds and video The book focuses on digital media rather than the customary survey of applications software designed to process these media In addition to teaching basic computer skills the authors promote information fluency in which students gain an understanding of the foundational concepts on which the technology is derived and develop higher level intellectual capabilities for applying the technology

The Top Books of the Year Actionable Ai Tools For Students Online The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous engrossing novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have charmed audiences this year. Actionable Ai Tools For Students Online : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Actionable Ai Tools For Students Online : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Pape, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is an exceptional and thrilling novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
