*YouTube* Jean Burgess, Joshua Green, 2018-08-28 Since launching as a website for everyday video sharing in 2005 YouTube has become one of the world's most powerful digital media platforms Originally published in 2009 when YouTube was only four years old this book was the first to systematically investigate its cultural impacts and politics highlighting the productive tensions between its amateur community rhetoric and its commercial media logics Since then YouTube has grown as a platform and matured as a company Its business model is built on coordinating the interests of and extracting value from its content creators audiences advertisers and media partners in a commercial setting where YouTube now competes with other powerful social media and streaming television platforms Meanwhile YouTube's diverse communities of content creators who developed the platform's most distinctive cultural forms and genres have strong ideas and interests of their own While preserving the original edition's forensic analysis of YouTube's early popular culture and uses this fully revised and updated edition weaves fresh examples updated theoretical perspectives

and comparative historical insights throughout each of its six chapters Burgess and Green show how over its more than a decade of existence YouTube's dual logics of commerciality and community have persisted generating new genres of popular culture new professional identities and business models for the media industries and giving rise to ongoing platform governance challenges The book is essential reading for anyone interested in the contemporary and future implications of digital media platforms and will be particularly valuable for students and scholars in media communication and cultural studies

**AI in Museums** Sonja Thiel, Johannes C. Bernhardt, 2023-12-04 Artificial intelligence is becoming an increasingly important topic in the cultural sector While museums have long focused on building digital object databases the existing data can now become a field of application for machine learning deep learning and foundation model approaches This goes hand in hand with new artistic practices curation tools visitor analytics chatbots automatic translations and tailor made text generation With a decidedly interdisciplinary approach the volume brings together a wide range of critical reflections practical perspectives and concrete applications of artificial intelligence in museums and provides an overview of the current state of the debate
