Structural Applications of Concrete with Recycled Solid Wastes and Alternatives for Cement Biao Hu, Jianping Lin, Nicola Nistico, Rui Hu, 2025-05-27 The development and application of sustainable construction materials are crucial steps toward creating environmentally friendly and low carbon buildings However on the one hand the significant increase in solid construction waste has raised global environmental concerns On the other hand the shortage of raw materials in concrete production has triggered concern about whether they can meet the escalating demand To address these issues sustainable construction material is a promising direction such as recycled aggregate concrete geopolymers concrete limestone calcined clay cement LC3 concrete etc In order to promote the

application of sustainable construction materials in practical engineering it is essential to study the structural behavior and durability of structures made with sustainable construction materials Structural design methods can be proposed based on AI technology to improve the efficiency in the utilization of sustainable construction materials *PC AI.* ,2001
