Abawajy, Kim-Kwang Raymond Choo, Zheng Xu, Mohammed Atiquzzaman, 2020-08-12 This book presents innovative ideas cutting edge findings and novel techniques methods and applications in a broad range of cybersecurity and cyberthreat intelligence areas As our society becomes smarter there is a corresponding need to secure our cyberfuture The book describes approaches and findings that are of interest to business professionals and governments seeking to secure our data and underpin infrastructures as well as to individual users Understanding Artificial Intelligence Nicolas Sabouret, 2020-12-09 Artificial

Intelligence AI fascinates challenges and disturbs us There are many voices in society that predict drastic changes that may come as a consequence of AI a possible apocalypse or Eden on earth However only a few people truly understand what AI is what it can do and what its limitations are Understanding Artificial Intelligence explains through a straightforward narrative and amusing illustrations how AI works It is written for a non specialist reader adult or adolescent who is interested in AI but is missing the key to understanding how it works The author demystifies the creation of the so called intelligent machine and explains the different methods that are used in AI It presents new possibilities offered by algorithms and the difficulties that researchers engineers and users face when building and using such algorithms Each chapter allows the reader to discover a new aspect of AI and to become fully aware of the possibilities offered by this rich field **THEORY AND APPLICATIONS**

**IN DEEP LEARNING** Dr. Shashi, Rashi Rastogi, Renato Racelis Maaliw III, Dr. Ashok Kumar, 2023-04-24 Deep learning is a subfield of computer science that is currently focusing the majority of its attention on the areas of video picture text and speech recognition in addition to autonomous driving robotics healthcare and other areas This is in addition to other areas such as robotics and healthcare Academics and academicians are currently showing a significant amount of interest in the field of deep learning This is because it is a subfield of study that focuses a significant emphasis on achieving outcomes which explains why this is the case Rina Dechter was the first person to use the phrase deep learning in 1986 and the building of an intelligent computer that could emulate the functioning of the human brain was the driving force behind the expansion of this field of study The term deep learning was coined by Rina Dechter who was also the first person to use the term The human brain which is in charge of decision making is the most important organ in the body In order for the brain to arrive at its conclusions it takes in data through its five senses sight smell touch and hearing Memory is another item that is stored in the brain and it is this memory that may be used to solve complicated problems by drawing on experiences that have been gained in the past Throughout the course of the past few decades scientists have kept alive the dream that they may one day be able to design a computer with intellect comparable to that of our own brains In order to make progress towards achieving this goal they have initiated research into the fundamental make up and operation of the human brain One of the primary motivations behind the development of autonomous vehicles as well as robots that are capable of performing a

variety of functions is the reduction in the number of collisions that take place along roadways This can be accomplished through the use of robots that are multi functional Because it is estimated by the World Health Organization WHO that 1 35 million people lose their lives on the roads of the world each year and since it is estimated that more than 90 percent of those deaths are the result of human errors that could have been avoided
