Long-Distance Dads Guide Drs. Danny R. Andreas Msc., 2025-05-15 I've lived it myself I wrote this book to share the knowledge I wish I'd known ten years ago before I became a distance dad before the legal battles and before parental alienation began It would have saved me so much time energy sanity and money You can't always be near your child But that doesn't mean you can't still be their dad Read this book if you want to build bonds that distance legal obstacles or parental alienation can't break Own Fatherhood It Matters Today Through research and trial and error I developed strategies across many areas that actually work The close bond my child and I share today despite all the odds is living proof of that My book

is filled with practical easy to follow tips you can apply right away It s not rocket science In fact you ll see much of it is just common sense Some of the things you ll learn Parent your child positively and effectively even from afar Build and keep a meaningful bond at each developmental stage Use tech and smart tricks to turn boring video calls into engaging moments Handle legal battles and parental alienation as a divorced or long distance dad Save money on legal fees travel and gifts You don t need permission to be a dad You just need the right knowledge and tools Let this guide help you become the dad your child remembers and respects no matter the circumstances *How AI Thinks* Nigel Toon,2024-02-08 THE 2 TIMES

BESTSELLER Artificial intelligence is going to have a massive impact on everyone s lives an accessible and sensible read that helps demystify AI Deborah Meaden entrepreneur and star of Dragon s Den Nigel Toon is a visionary leader in the field of artificial intelligence a must read Marc Tremblay Distinguished Engineer Microsoft Those who understand how AI thinks are about to win big We are used to thinking of computers as being a step up from calculators very good at storing information and maybe even at playing a logical game like chess But up to now they haven t been able to think in ways that are intuitive or respond to questions as a human might All that has changed dramatically in the past few years Our search engines are becoming answer engines Artificial intelligence is already revolutionising sectors from education to healthcare to the creative arts But how does an AI understand sentiment or context How does it play and win games that have an almost infinite number of moves And how can we work with AI to produce insights and innovations that are beyond human capacity from writing code in an instant to unfolding the elaborate 3D puzzles of proteins We stand at the brink of a historic change that will disrupt society and at the same time create enormous opportunities for those who understand how AI thinks Nigel Toon shows how we train AI to train itself so that it can paint images that have never existed before or converse in any language In doing so he reveals the strange and fascinating ways that humans think too as we learn how to live in a world shared by machine intelligences of our own creation **We Talk, Spell, and Write** Marion Monroe,A.
