Achieving Quality of Life at Work Suhana Mohezar, Noor Ismawati Jaafar, Waqar Akbar, 2021-08-23 This book provides an understanding and imaging of how a stress-free workplace might be designed and implemented in the context of the new normal. Statistics show that more and more people are experiencing an increase in work-related stress and its impact on individual psychology and well-being, as well as organizational performance, can be devastating. Globally, the most recent data on work-related illnesses account for 2.4 million deaths. Against this backdrop and taking stock of how the pandemic is affecting the workplace and employee well-being, this book proposes transformations in work spaces from implementing effective greening features to more efficient technology-supported spaces. It establishes links between workplace design and creativity, happiness, and productivity, confronting related issues such as generation gaps, digital interruptions, collaborative work environments, and sustainability, and their respective connections with workspace environment and well-being. The book situates this discussion within a broader discussion on work and quality of life. Furthermore, the book demonstrates how several sustainable development goals might be achieved through transformed work spaces. Through an intersection between organizational psychology, well-being, and quality of life studies, sociology, human resources, and ergonomics, this book is a timely examination of work-related stress in relation to work spaces that require rethinking and transformation in the throes and wake of the pandemic.
