From Research to Practice Deborah S. Grealy,Sylvia D. Hall-Ellis,2009-03-20 New faculty members after arrive with little experience in teaching or planning for teaching This book helps overcome that challenge Many if not most schools of library and information science have many students seeking a second career The information concerning teaching adult learners will be especially helpful for this age group Different types of learning can be identified and made clear by thinking systematically about outcomes with strategies Patterned after the matrix designed by

Professor James R Davis in his book *Highly Effective Strategies* this book provides behavioral cognitive inquiry mental models group dynamics virtual reality and holistic strategies Each is described and explanations are given for how it is most effective for developing exercises to instruct reinforce and assess specific types of learning Each strategy also comes with its own appropriate measures of success Sample materials are included to illustrate these adaptations of the Davis matrix and materials about specific activities and course outcomes are drawn from the authors ongoing curriculum audit This book provides a structured platform that serves as a model for teaching and assessing student learning in applied LIS Courses Following Davis's premise that different types of learning can be identified and made clear by thinking systematically about outcomes with strategies including behavioral cognitive inquiry mental models group dynamics virtual reality and holistic Each strategy is deemed most effective in developing exercises to instruct reinforce and assess specific types of learning Each strategy comes with its own appropriate measures of success With the ALA Committee on Accreditation Standards reflecting the need for student learning outcomes this book provides both the introduction to this form of evaluation and provides examples of courses using this method of assessment Build Your Own Information Literate School Carol Koechlin, Sandi Zwaan, 2003 Provides strategies for teaching information literacy and assesses how well students can practice what they learn *Leadership Resources*, 2000 *Handbook of Online Learning* Kjell Erik Rudestam, Judith Schoenholtz-Read, 2002-02-19 I found the book excellent and read every one of the 450 pages Many of the chapters reflect the Fielding Institute's focus on human and organizational behaviour educational leadership and organizational management The book will be particularly appropriate for readers from a corporate training or business school background though there is much for academics and online educators at all levels and subject areas to learn from this well crafted book There are many books and articles about online learning This is one of the better ones Robin Mason Computers and Education Technology mediated instruction has taken the university and the corporate sector by storm As more instructors teach online for a dispersed learning community in both academic and business environments there's a need for resources that will help them adapt to this new teaching method Educators who come out of traditional academic institutions tend to use traditional methods when offering courses online e.g lectures textbooks and readings examinations rather than attend to small group processes and principles of what the editors of this volume call andragogy This Handbook goes beyond the mechanics of how to create and direct an online learning experience to consider such a new approach to pedagogy in doing so The editors primary purpose is to clarify the conceptual issues that underlie effective online teaching and to offer practical guidance to educators and corporate trainers who plan to teach in a virtual environment Their central tenet is the adoption of computer networks as the teaching vehicle of the future demands a re-examination of our core beliefs about pedagogy and how students learn The transfer of a classroom curriculum into cyberspace is deceptively simple but doing so without an appreciation of the nuances and implications of learning online ignores not only the potential of this medium but the

inevitable realities of entering it Rather than fear the challenges that new technology brings to systems of learning the editors hope to help instructors embrace it by re thinking how knowledge is acquired and how educational processes may be optimally designed in a new age of teaching and learning Features Benefits Part I provides an overview and includes discussion of the unique structural aspects of the electronic learning environment pedagogical issues curriculum design psychological and group dynamics and ethical issues Part II examines practical issues associated with implementing courses online both in the traditional university setting and in professional corporate training environments The book draws heavily on personal case examples many from The Fielding Graduate Institute s 26 years of teaching in nontraditional distributed learning environments Proceedings of the Virtual Worlds and Simulation Conference (VWSIM '99) Christopher Landauer, Kirstie L. Bellman, 1999 **Training** ,2006 **School and Community** ,1997
