The Communist Youth League and the Transformation of the Soviet Union, 1917-1932 Matthias Neumann, 2011 The study of Soviet youth has long lagged behind the comprehensive research conducted on Western European youth culture In an era that saw the emergence of youth movements of all sorts across Europe the Soviet Komsomol was the first state sponsored youth organization in the first communist country Born out of an autonomous youth movement that emerged in 1917 the Komsomol eventually became the last link in a chain of Soviet socializing agencies which organized the young Based on extensive archival research and building upon recent research on Soviet youth this book broadens our understanding of the social and political dimension of Komsomol membership during the momentous period 1917 e1932 It sheds light on the complicated interchange between ideology policy and reality in the league s evolution highlighting the important role ordinary members played The transformation of the country shaped Komsomol members and their league s social identity institutional structure and social psychology and vice versa the organization itself became a crucial force in the dramatic changes of that time The book investigates the complex dialogue between the Communist Youth League and the regime unravelling the intricate process that transformed the Komsomol into a mere institution for political socialization serving the regime s quest for social engineering and control

Youth Work Graham Bright, Carole Pugh, 2019-01-04 There is on going debate in youth and community work regarding its future Driven by processes of neo liberal governmentality youth work has been bent in new and uncomfortable directions For many this threatens the very telos of praxis However despite this a passionate commitment to youth work s values and approaches doggedly remains This

edited volume invites academics working in different continents and contexts to move beyond a critique of youth work's current state towards imagining different professional futures. Rooted in the profession's historic values and drawing on the distinct political and cultural environments that have shaped youth work practice in different global locations, the authors explore possible new routes and approaches for the profession. These discussions are located geographically in a devolved United Kingdom, Europe, United States, Australasia, and the Developing Majority world, as well as across different sectors and approaches: voluntary sector, faith sector, online, young women's work. The result is a rich picture of global practice. This provides both depth and perspective from which to gain new insights regarding possibilities for future practices which imagine fairer and more participative societies. *Handbook of Youth Prevention Science* Beth Doll, William Pfohl, Jina S. Yoon, 2012-03-07. The *Handbook of Youth Prevention Science* describes current research and practice in mental health preventive interventions for youth. Traditional prevention research focused on preventing specific disorders, e.g. substance abuse, conduct disorders, or criminality. This produced silos of isolated knowledge about the prevention of individual disorders without acknowledging the overlapping goals, strategies, and impacts of prevention programs. This Handbook reflects current research and practice by organizing prevention science around comprehensive systems that reach across all disorders and all institutions within a community. Throughout the book, preventive interventions are seen as complementary components of effective mental health programs, not as replacements for therapeutic interventions. This book is suitable for researchers, instructors, and graduate students in the child and adolescent mental health professions: school psychology, school counseling, special education, school social work, child clinical psychology, and the libraries serving them. It is also suitable for graduate course work in these fields. *Routledge Handbook of Peacebuilding* Roger Mac Ginty, 2024-08-20. This updated and revised second edition of the *Routledge Handbook of Peacebuilding* contains cutting-edge analyses of contemporary attempts to reach and sustain peace. The book covers the main actors and dynamics of peacebuilding, as well as the main challenges that it faces, with accessible chapters. The volume is comprehensive, covering everything from the main international institutions for peacebuilding to the links between peacebuilding and climate change or peacebuilding and trauma. It is also firmly interdisciplinary, with a number of chapters devoted to showcasing how different disciplines interpret peacebuilding and how they contribute to it. Bringing together leading thinkers and practitioners on peacebuilding, many from the Global South, the handbook offers a valuable hands-on perspective on how peace can be secured and sustained. There is a significant emphasis on comparison, and the book shows how peacebuilding is best examined from the vantage point of multiple cases. The book is organized into six thematic sections: Part I Architecture and Actors; Part II Reading Peacebuilding; Part III Issues and Approaches; Part IV Violence and Security; Part V Everyday Living; Part VI Disciplinary Approaches. This book will be essential reading for students of peacebuilding, mediation, and post-conflict reconstruction, and of great interest to students of statebuilding, intervention, civil wars, conflict resolution, war, and conflict studies, and IR in general. Chapter 25 of this book is

Digital Humanities in the India Rim Hart Cohen, Ujjwal Jana, Myra Gurney, 2024-11-06 This varied collection delves into illuminating examples of Digital Humanities research and practice currently being undertaken by academics in India and Australia and seeks to understand the shared challenges as well as the points of similarity and difference between them. From the influence of Netflix on International Relations to contemporary digital adaptations of Mary Shelley's *Frankenstein* via detours into robotics, empathic robots and the cultural specificity of online dating, these essays convey the distinctive breadth and imagination of research in this field. Digital Humanities is a relatively new discipline in the India Rim and this novelty has created space for innovative research ideas as well as the use of traditional methodologies and software in different ways within these unique cultural spaces that could potentially influence how Digital Humanities is conceptualised internationally. For example, drawing on Indian classical logic leads to novel designs and applications of computation. This lively volume offers a fresh look at the Digital Humanities and an important overview of the work taking place in a region other than the Western countries.
