10x10 Chess variant with 2 new pieces

The Cannon

When not capturing, it moves just like the Rook. But to capture a piece, there must be one additional piece in its path which the Cannon jumps over before landing on the piece being captured. This intervening piece may belong to either player. The cannon may not jump over more than one piece to make its capture, and may not jump over pieces when not capturing.

The Elephant

Steps diagonally one or two squares, leaping over the intermediate square if it is occupied.
