English-Medium Instruction in Higher

Education in Hong Kong Jack Pun, Wenyun Jia, 2025-12-11 This book explores issues of teaching science technology engineering and math STEM through the medium of English in the context of higher education in Hong Kong It analyses

policy issues and language challenges faced by university students and pedagogical strategies for the professional development of English Medium of Instruction (EMI) teachers. Hong Kong as a focus case is valuable because nearly 60% of government funded university programmes are STEM or science related while over 90% of the student population speaks Chinese as a first language but also speak and write English due to local language policies and Hong Kong's colonial history making it a useful site for EMI research. By providing an evidence based pedagogically focused analysis of teacher and student classroom practices and their perceptions this book sheds light on ways to improve the quality of instructional practices and effective scaffolding in different types of EMI classrooms in Hong Kong and in similar contexts around the world. The examples of the EMI lessons with annotated notes which showcase good practices of EMI teaching will be particularly valuable to university EMI coordinators, content subject and English teachers and instructors doing EMI professional development courses.

Computers in Education, 1990 Current Index to Journals in Education, 1995

Children and Computers Elisa L. Klein, 1985 **The Development of Reading Skills** Thomas H. Carr, 1985. Focusing on how children learn to read in a language they have previously only spoken this book illustrates the skill theory of reading development which encompasses both new perceptual processes and modified but familiar integrative cognitive processes of language comprehension. The chapters discuss the following aspects of learning to read: 1 phonemic analysis spelling and reading 2 literacy background and reading development in a second language 3 knowing words and understanding texts 4 discourse structure and mental models 5 the impact of classroom activities on beginning reading development 6 using component skills analysis to integrate findings on reading development and 7 bridging the gap between theory and practice in reading. The final chapter lists several journals that publish high quality research on reading and a number of books that provide systematic introduction to the area of reading.
