Comparing State Politics Michael J. Sullivan, 1996-05-16 Since the end of the Cold War many new countries have been created and several new wars have broken out resulting in new forms of politics and government for which Cold War paradigms are inadequate Using extensive exhibits this book provides a comparative framework for understanding governance in today's world The author selects 100 countries as worthy of greater investigation highlighting 50 of them as prone to ethnic based problems and 33 as beset by violent domestic conflict and provides a comparative political analysis of their governing structures The 100 countries covered are spread equitably across five geographical zones Europe Islamic Zone Africa Asia and the Western Hemisphere Dividing the 100 selected states into polity types the author studies five civilian polities encompassing 50 states and five military polities embracing another 50 states The volume relates polity types to the ethnic and military challenges facing them and analyzes the phenomena of nationalism and militarism In addition to numerous tables and other exhibits the author uses Formats of Analysis for the orderly display of comparative data on states of particular polity types This study provides the student of comparative politics with analytic and conceptual tools to understand governance in the post Cold War world The work is a worthy addition to the literature of comparative political analysis

Comparative Politics B. Guy Peters, 1998-10 This book examines the issues involved in the attempts to compare political systems and discusses how the methods and results of comparative politics can be improved

American Adventurism Abroad Michael J. Sullivan, 2004-08-30 This book provides a comparative analysis of 30 American interventions into Third World countries An historical approach is used to place the featured cases into a more general history of American Diplomacy The author uses his assessments to prove that U S foreign policy has been driven by the goal of being the ultimate power in the global capitalist economic system The author makes his work unique by giving a critical view of America's place in the world during an anticipated time of war and raised patriotism He provides a scholarly look at U S diplomacy leading up to the era of the War on Terror Sullivan explains how over the past 50 years the U S has come to succeed Europe as ruler of the global economic system The political systems which have been promoted by the U S to preserve worldwide capitalism range from one party rule to monarchies and recurring civil war The interventions discussed have proved to be short term successes for U S policy but more often tragic for the local societies affected Sullivan draws on his 1996 release *Comparing State Politics* to create a number of tables that place U S involvement into geographic and hierarchic perspective The reader is ultimately provided with a provocative thesis that challenges traditional interpretations of America's role in the world This book will be an asset to any undergraduate college student taking classes in political

science or history It will also appeal to a general audience *Democratic Accountability and International Human Development* Kamran Ali Afzal, Mark Considine, 2014-11-27 Scholars and policymakers have long known that there is a strong link between human development and spending on key areas such as education and health However many states still neglect these considerations in favour of competing priorities such as expanding their armies This book examines how states arrive at these decisions analysing how democratic accountability influences public spending and impacts on human development The book shows how the broader paradigm of democratic accountability extending beyond political democracy to also include bureaucratic and judicial institutions as well as taxation and other modes of resource mobilisation can best explain how states allocate public resources for human development Combining cross country regression analysis with exemplary case studies from Pakistan India Botswana and Argentina the book demonstrates that enhancing human capabilities requires not only effective party competition and fair elections but also a particular nesting of public organisational structures that are tied to taxpaying citizens in an undisturbed chain of accountability It draws out vital lessons for institutional design and our approach to the question of human development particularly in the less developed states This book will be of great interest to postgraduate students and researchers in the fields of political economy public policy governance and development It also provides valuable insights for those working in the international relations field including inside major aid and investment organisations
