

## Basic Genetics Practice Problems

### Part 1: Mendel's Works

Mendel made the following crosses with pea plants. Complete the Punnett Squares and answer the following questions.

R = red flowers

r = white flower

- He crossed a red flowered R plant with a white flowered r plant. His results were 126 red flowered plants and 122 white flowered plants. Which of the Punnett squares above best show the parents and offspring that could give these results?  
Punnett square #4 best shows the parents and offspring from this cross.
- He crossed a red flowered plant with a white flowered plant. His results were 307 red flowered plants and 0 white flowered plants. Which of the Punnett squares above best show the parents and offspring that could give these results?  
Punnett square #1 best shows the parents and offspring from this cross.
- He crossed a red flowered plant with a red flowered plant. His results were 306 red flowered plants and 110 white flowered plants. Which of the Punnett squares above best show the parents and offspring that could give these results?  
Punnett square #3 best shows the parents and offspring from this cross.
- He crossed a red flowered plant with a red flowered plant. His results were 300 red flowered plants and 0 white flowered plants. Which of the Punnett squares above best show the parents and offspring that could give these results?  
Punnett square #2 best shows the parents and offspring from this cross. It is possible that Punnett square #3 could have produced these results as well and just by chance, none of the offspring were white.

### Part 2: Monohybrid Crosses

- In minks, coat color is controlled by a single gene. The allele for a brown (B) coat is dominant to the allele for silverblue (b) coats.  
B = brown coats  
b = silverblue coats
  - A homozygous brown mink was crossed with a silverblue mink. There were 9 offspring in the F1 generation. What color were they?  
All 9 offspring would be brown. They each inherited the dominant all from their brown parent.  
Cross: BB x bb

## **Solving Problems in Genetics**

Richard Kowles, 2013-12-01 The principle objective of this book is to help undergraduate students in the analysis of genetic problems Many students have a great deal of difficulty doing genetic analysis and the book will be useful regardless of which genetics text is being used Most texts provide some kinds of problems and answers few if any however show the students how to actually solve the problem Often the student has no idea how the answer was derived This work emphasizes solutions not just answers The strategy is to provide the student with the essential steps and the reasoning involved in conducting the analysis Throughout the book an attempt is made to present a balanced account of genetics Topics therefore center about Mendelian cytogenetic molecular quantitative and population genetics with a few more specialized areas Whenever possible the student is provided with the appropriate basic statistics necessary to make some of the analyses The book also builds on itself that is analytical methods learned in early parts of the book are subsequently revisited and used for later analyses A deliberate attempt is made to make complex concepts simple and sometimes to point out that apparently simple concepts are sometimes less so on further investigation Any student taking a genetics course will find this book an invaluable aid to achieving a good understanding of genetic principles and practice

*Genetics* Daniel L. Hartl, Elizabeth W. Jones, 2009 This handbook covers all dimensions of breast cancer prevention diagnosis and treatment for the non oncologist A special emphasis is placed on the long term survivor

**Genetics** Daniel Hartl, Maryellen Ruvolo, 2012 This textbook gives an introduction to genetics and genomics at the college level It contains a chapter on human genetic evolution Other chapters treat transmission genetics molecular genetics and evolutionary genetics and provide an understanding of the basic process of gene transmission mutation expression and regulation
