Advancing STEM Education and Innovation in a Time of Distance Learning González-Lezcano, Roberto Alonso,2022-10-21 Due to the recent global pandemic educators of science and technology have had to pivot and adapt their

delivery to create alternative virtual means of delivery The COVID 19 pandemic has influenced a rapid change in teaching and learning in higher education It is reshaping curriculum demands the 21st century digital competence challenges and learning technologies These changes in education are likely to endure well past the COVID 19 pandemic making it crucial for educators to consider teaching and learning under the perspectives of digital education and innovation Advancing STEM Education and Innovation in a Time of Distance Learning highlights the contemporary trends and challenges in science technology mathematics and engineering education The chapters present findings and discussions of relevant research studies and theoretical frameworks for the provision of science technology engineering and technical subjects It not only presents successful practice examples from before and during the COVID 19 pandemic but also provides useful information to assist educators in understanding the demands and challenges of digital education Covering topics such as ethnically diverse students foreign language learning and mobile gamification this premier reference source is an essential resource for educators and administrators of both K 12 and higher education pre service teachers teacher educators librarians government officials researchers and academicians

A Hacker's Mind Bruce Schneier, 2023-02-07 A Hacker's Mind sheds vital light on the beginnings of our journey into an increasingly complex world Financial Times It's not just computers hacking is everywhere Legendary cybersecurity expert and New York Times best selling author Bruce Schneier reveals how using a hacker's mindset can change how you think about your life and the world A hack is any means of subverting a system's rules in unintended ways The tax code isn't computer code but a series of complex formulas It has vulnerabilities we call them loopholes We call exploits tax avoidance strategies And there is an entire industry of black hat hackers intent on finding exploitable loopholes in the tax code We call them accountants and tax attorneys In A Hacker's Mind Bruce Schneier takes hacking out of the world of computing and uses it to analyze the systems that underpin our society from tax laws to financial markets to politics He reveals an array of powerful actors whose hacks bend our economic political and legal systems to their advantage at the expense of everyone else Once you learn how to notice hacks you'll start seeing them everywhere and you'll never look at the world the same way again Almost all systems have loopholes and this is by design Because if you can take advantage of them the rules no longer apply to you Unchecked these hacks threaten to upend our financial markets weaken our democracy and even affect the way we think And when artificial intelligence starts thinking like a hacker at inhuman speed and scale the results could be catastrophic But for those who would don the white hat we can understand the hacking mindset and rebuild our economic political and legal systems to counter those who would exploit our society And we can harness artificial intelligence to improve existing systems predict and defend against hacks and realize a more equitable world
