Diffusing Geography Essays For Peter Haggett:

Diffusing Geography A. D. Cliff, Peter R. Gould, Anthony G. Hoare, Nigel Thrift, 1991-01-16 A volume celebrating the work of the twentieth century's leading geographer should in itself be an event of importance for the discipline. This book lives up to that ambition for in its quality, breadth and originality it reflects the attributes of the man it honours. The contributors include Richard Chorley, Peter Gould, Torsten Hagerstrand, David Harvey and R. J. Johnston. **Key Thinkers on Space and Place** Phil Hubbard, Rob Kitchin, 2010-11-30 In this latest edition of *Key Thinkers on Space and Place* editors Phil Hubbard and Rob Kitchin provide us with a fully revised and updated text that highlights the work of over 65 key thinkers on space and place. Unique in its concept, the book is a comprehensive guide to the life and work of some of the key thinkers particularly influential in the current spatial turn in the social sciences. Providing a synoptic overview of different ideas about the role of space and place in contemporary social, cultural, political and economic life, each portrait comprises biographical information and theoretical context. An explication of their contribution to spatial thinking. An overview of key advances and controversies. Guidance on further reading. With 14 additional chapters including entries on Saskia Sassen, Tim Ingold, Cindi Katz and John Urry, the book covers ideas ranging from humanism, Marxism, feminism and post-structuralism to queer theory, post-colonialism, globalization and deconstruction, presenting a thorough look at diverse ways in which space and place has been theorized. An essential text for geographers, this now classic reference text is for all those interested in theories of space and place, whether in geography, sociology, cultural studies, urban studies, planning, anthropology or women's studies.

Poststructuralist Geographies Marcus Doel, 1999-08-30 This work is the first attempt to integrate poststructuralist thought with the insights of critical human geography. Doel does not seek to make conventional approximations of poststructuralist concepts but to rethink and rewrite the world through them. [Encyclopedia of Geographic Information Science](#) Karen Kemp, 2008 Geographic information science (GIScience) is an emerging field that combines aspects of many different disciplines. Spatial literacy is rapidly becoming recognized as a new essential pillar of basic education alongside grammatical, logical and mathematical literacy. By incorporating location as an essential but often overlooked characteristic of what we seek to understand in the natural and built environment, geographic information science (GIScience) and systems (GISystems) provide the conceptual foundation and tools to explore this new frontier. The *Encyclopedia of Geographic Information Science* covers the essence of this exciting new and expanding field in an easily understood but richly detailed style. In addition to contributions from some of the best recognized scholars in GIScience, this volume contains contributions from experts in GIS supporting disciplines who explore how their disciplinary perspectives are expanded within the context of GIScience: what changes when consideration of location is added; what complexities in analytical procedures are added when we consider objects in 2, 3 or even 4 dimensions; what can we gain by visualizing our analytical results on a map or 3D display. **Key Features:** Brings together GIScience literature that is spread widely across the academic spectrum. Offers details
