Beyond Code Daniel Plate, James Hutson, 2025-09-02 AI powered coding tools are revolutionizing software development transforming programming from a specialized skill into an accessible educational practice across disciplines This book investigates how tools such as Cursor AI GitHub Copilot and Replit's Ghostwriter are dismantling traditional barriers to entry for learners particularly those from non STEM backgrounds by enabling natural language code generation intelligent debugging and interactive project based learning Bridging the gap

between theoretical instruction and practical application the book serves as both a guide and a critical framework for integrating generative AI into curricula It highlights how these tools expand the boundaries of programming education by supporting interdisciplinary applications from literary analysis to creative writing thereby making coding relevant and actionable for students in the humanities and beyond The book equips educators with the tools and strategies necessary to incorporate AI assisted programming into diverse academic contexts by offering lesson plans and adaptable project models This resource is essential for instructors seeking to demystify coding promote inclusivity in technical learning and reimagine the role of software literacy in the twenty first century classroom

Handbook of Research on Teaching With Virtual Environments and AI Panconesi, Gianni, Guida, Maria, 2021-02-19 The increasingly pervasive use of digital technology has catapulted society into an interconnected world where the natural boundaries between humankind and machine virtual and real individual and community have become less perceptible As individuals interact with different digital technologies they must build a digital intelligence which must be further cultivated as it is a key competency for the future of school and work Digital intelligence includes understanding the mutual strengths between people and technology as well as developing an awareness in the use of digital tools in order to avoid common threats such as cyberbullying addiction to video games techno stress and more As adolescents continue to engage with virtual reality and 3D virtual worlds where the online and offline overlap and coincide it is important to build this intelligence as well as utilize these technologies to promote successful learning The Handbook of Research on Teaching With Virtual Environments and AI explores the new personalized educational opportunities that are available with digital technology and virtual environments that can be used within education This book focuses on the use of these tools and how to navigate the use of new technologies such as AI and virtual environments for educational practices While highlighting topics such as virtual worlds game based learning intelligent tutoring augmented reality and more this book is ideal for teachers administrators technologists educational software developers IT specialists practitioners researchers academicians and students interested in how virtual environments and AI are being implemented in teaching practices

Exploring Technology-Infused Education in the Post-Pandemic Era Tomei, Lawrence A., Carbonara, David D., 2024-08-05 In the aftermath of the 2020 2022 pandemic educators find themselves grappling with the decision to revert to traditional instructional methods or embrace the transformative power of 21st century technologies The swift integration of virtual classrooms videoconferencing and social media during the pandemic has left teachers navigating uncharted territory Many who once vehemently resisted technology now stand on the precipice of a digital revolution in education This dichotomy poses a pressing problem a dearth of documented research and guidance for educators seeking to measure the true value of these technologies in the post pandemic era Exploring Technology Infused Education in the Post Pandemic Era offers guidance and solutions to the challenges faced by educators As teachers stand on the brink of a pivotal decision the research community lags behind in providing the necessary insights to inform their choices

The questions loom large What technologies emerged during the pandemic and have they proven effective in the classroom Can these innovations seamlessly coexist with traditional instructional methods The void in documented research leaves educators in a quandary lacking the evidence needed to make informed decisions about the integration of technology into their teaching practices This critical gap impedes progress and hinders the unleashing of the full potential of 21st century educational tools
