research has identified positive learning effects from the student's perspective Weurlander et al 2012 However in their extensive review Van der Kleij and Lipnevich 2021 found that the field of students' perceptions of assessment feedback lacks clear definitions in addition to deeper relations to theory Methodological shortcomings in self-reporting feedback studies are also found in Brown and Zhao 2023 Consequently the relatively large body of research on the topic is isolated and diverse As such the existing research offers minimal understanding of the connection between students' perceptions of feedback their engagement with it and the outcome of the assessment feedback Van der Kleij Winstone Elementary students' view of formative assessment processes and outcomes Assessment environment for different groups/levels of students Longitudinal perspectives on emotions towards formative assessment Theoretical approaches to students' perceptions of assessment feedback Students' view of the feedback process as generators of feedback Students' experiences of use of AI in assessment
