**Humanitarian extractivism** Kristin Bergtora Sandvik, 2023-10-17 This book investigates the digital transformation of aid as a form of humanitarian extractivism. It focuses on how practices of data extraction shift power towards states, the private sector, and humanitarians. Digital initiatives aimed towards fixing the humanitarian system, making it better and more secure, also create risk and harm for vulnerable individuals and communities. Central to the digital transformation of aid is the digital body with digital identities becoming a prerequisite for receiving aid and protection, and the centralisation of vulnerability arising from enormous databases holding ever more humanitarian data. Cyber attacks, human error, and technological problems generate risks for humanitarians but also mean that humanitarians themselves can put populations in need at risk. The book explores new humanitarian spaces and practices such as the humanitarian drone airspace, wearable innovation, challenges, and ethics in global disaster innovation labs.

**Human-Automation Interaction** Vincent G. Duffy, Mark Lehto, Yuehwen Yih, Robert W. Proctor, 2022-09-30 This book provides practical guidance and awareness for a growing body of knowledge developing across a variety of disciplines and many countries. This book is a celebration of the Gavriel Salvendy International Symposium (GSIS) and provides a survey of topics and emerging areas of interest in human automation interaction. This book for the GSIS emphasizes main thematic areas: manufacturing services and user experience. Main areas of coverage include Section A: Advanced Production Management and Production Control; Section B: Healthcare Automation; Section C: Measuring and Modeling Human Performance; Section D: Usability and User Experience; Section E: Safety Management and Occupational Ergonomics; Section F: Manufacturing and Services; Section G: Data and Probabilistic Information; Section H: Training and Collaboration Technologies. Contributions from especially early career researchers were featured as part of this virtual symposium and celebration. Gavriel Salvendy initiated the conferences that run annually as Human Computer Interaction International and Applied Human Factors and Ergonomics International (AHFE) both within the Lecture Notes in Computer Science series published by Springer. The book is inclusive of human computer interaction and human factors and ergonomics principles yet it is intended to serve a much wider audience that has interest in automation and human modeling. The emerging need for human automation interaction expertise has developed from an ever growing availability and presence of automation in our everyday lives.
