Actionable Hybrid Work Schedule Tips For Teachers:

Navigating The Digital Shift: Implementation Strategies for Blended and Online Learning John Bailey, Carri Schneider, Tom Vander Ark, 2013-10-09 Our nation's schools stand at an important inflection point in the history of education. Taken together, the implementation of common college and career standards, the shift to next generation assessments, the availability of affordable devices, and the growing number of high quality digital instructional tools create an unprecedented opportunity to fundamentally shift the education system to personalize learning around the individual needs of every student. Digital Learning Now (DLN), a national initiative under the Foundation for Excellence in Education (ExcellinEd) in association with Getting Smart, brings *Navigating the Digital Shift: Implementation Strategies for Blended and Online Learning* to readers interested in exploring the implementation challenges at the intersection of these shifts. Co-authored by John Bailey, Carri Schneider, and Tom Vander Ark, *Navigating the Digital Shift* offers updated versions of the eight papers originally released in the DLN Smart Series, including contributions from 11 additional co-authors representing leading organizations such as Public Impact, the International Association for K-12 Online Learning (iNACOL), and The Learning Accelerator. Topics include blended learning implementation, teaching conditions, and careers competency-based learning, student data, online learning myths, and student-based funding. Jeb Bush, Governor of Florida from 1999-2007 and Chairman of ExcellinEd, contends that the book provides policymakers and education leaders the tools they need to use digital learning as a catalyst for improved student achievement. AASA 2013 Superintendent of the Year, Dr. Mark Edwards, believes the collection provides meaningful practical and poignant advice as well as commentary regarding the move to college and career-ready standards associated with the shift to personal online learning and digital resources. Rhode Island's Commissioner of Elementary and Secondary Education, Deborah Gist, describes the book as an invaluable resource that will help educators re-imagine what our schools can look like and what our students can accomplish.

Making an Impact Outside of the Classroom: A Complete Guide to the Exciting Job Possibilities for Educators Starr Sackstein, 2024-07-31 Looking for a job change in education? This handy comprehensive resource will help you explore different career paths in education that will still allow you to use the skillsets and unique qualifications you developed as a teacher or leader. Bestselling author Starr Sackstein begins by helping you decide whether you want to move into another position or leave altogether. She then shows you how to seek opportunities, take risks, network, and prepare for interviews. Next, she presents a wide variety of career pathways for educators, including school and district-based options, consulting work, EdTech opportunities, publishing jobs, higher education, and more. Starr also answers frequently asked questions such as how much you should charge and whether you need additional degrees. Throughout, there are case studies highlighting people who have left to do alternate jobs and their top takeaways. An accompanying video series offers even more advice from a wide variety of educators who have switched roles. With this helpful guide, you'll feel empowered to courageously restart and continue to leave a legacy in education.

Handbook of

Research on Teaching Drew Gitomer, Courtney Bell, 2016-05-19 The Fifth Edition of the Handbook of Research on Teaching is an essential resource for students and scholars dedicated to the study of teaching and learning. This volume offers a vast array of topics ranging from the history of teaching to technological and literacy issues. In each authoritative chapter, the authors summarize the state of the field while providing conceptual overviews of critical topics related to research on teaching. Each of the volume's 23 chapters is a canonical piece that will serve as a reference tool for the field. The Handbook provides readers with an unparalleled view of the current state of research on teaching across its multiple facets and related fields.

Transforming Digital Learning and Assessment Peggy L. Maki, Peter Shea, 2023-07-03 Responding to both the trend towards increasing online enrollments as the demand for face-to-face education declines and to the immediate surge in remote learning owing to the COVID-19 pandemic, this book provides vital guidance to higher education institutions on how to develop faculty capacity to teach online and to leverage the affordances of an ever-increasing array of new and emerging learning technologies. This book provides higher education leaders with the context they need to position their institutions in the changing online environment and with guidance to build support in a period of transition. It is intended for campus leaders and administrators who work with campus teams charged with identifying learning technologies to meet an agreed-upon program or institution-level educational needs for those coordinating across campus to build consensus on implementing online strategies and for instructional designers, faculty developers, and assessment directors who assist departments and faculty effectively integrate learning technologies into their courses and programs. It will also appeal to faculty who take an active interest in improving online teaching. The contributors to this volume describe the potential of artificial intelligence algorithms such as those that fuel learning analytics software that mines LMS data to enable faculty to quickly and efficiently assess individual students' progress in real time, prompting either individual attention or the need to more generally clarify concepts for the class as a whole. They describe and provide access to a hybrid professional development MOOC and an associated WIKI that curate information about a wide range of learning software solutions currently available and present case studies that offer guidance on building the buy-in and consensus needed to successfully integrate learning technologies into course, program, and institution-level contexts. In sum, this book provides readers with a comprehensive understanding of the technological capabilities available to them and identifies collaborative processes related to engaging and building institutional support for the changes needed to provide the rapidly growing demand for effective and evidence-based online learning.

Building Tomorrow's Biomedical Workforce: Evaluation of How Evidence-Based Training Programs Align Skill Development and Career Awareness with a Broad Array of Professions Adriana Bankston, Rebekah L. Layton, Audra Van Wart, 2025-08-27 Building the future STEM workforce requires robust federal investments to support the next generation of innovators as well as systemic changes to enable graduate and postdoctoral researchers to transition with confidence into the biomedical workforce. This effort involves the transformation of the

biomedical research enterprise and training environment at all levels but especially at the predoctoral and postdoctoral levels Innovative initiatives in education and training as well as career and professional development of biomedical trainees are necessary to build upon the robust biomedical workforce of today and create and sustain a diverse innovative and highly trained biomedical workforce of tomorrow An important aspect of supporting the biomedical workforce relates to changes within training and the research enterprise with opportunities for re imagining what STEM education should look like at different levels including providing agency for junior scientists in the field The future of the field should focus on inclusivity supporting trainees from different backgrounds and with diverse perspectives including but not limited to intersectional identities in race ethnicity gender sexual orientation first generation status and international talent in STEM This requires critical policy changes in order to support the transition of biomedical research professionals into the labor market
