Advanced Ai Automation Tools In The United States:

Deploying Artificial Intelligence to Achieve the UN Sustainable Development Goals Arthur Guseni Oliver

Mutambara,2025-07-01 This book provides research insights into how Artificial Intelligence AI can be used to achieve the UN's Sustainable Development Goals SDGs 17 interconnected goals designed to address the world's most pressing challenges by 2030. It reviews the SDGs and discusses why progress has been mixed and uneven across different countries, regions, and goals. The book posits that attaining the SDGs will depend on enhanced global cooperation, increased funding, improved infrastructure, public-private partnerships, regional/continental integration, addressing the climate crisis, inclusive economic transformation, and visionary leadership. More specifically, the publication advocates leveraging innovative and transformative technologies, particularly the deployment of AI. The research acknowledges the risks of digital imperialism, data colonialism, and technological exclusion, especially in emerging and least industrialised economies. Hence, in deploying AI to achieve the SDGs, the book puts a premium on decoloniality in AI systems and democratising AI technology. Provides a critique of the current SDGs approach by reframing the goals as a comprehensive risk assessment of humanity's most pressing threats in the 21st century. Features broad and holistic interventions to accelerate the attainment of the SDGs. Provides a comprehensive but accessible introduction to AI concepts and advanced innovations such as AlphaFold, ChatGPT 4, DeepSeek R1, Grok 3, and autonomous vehicles, drones, and driverless cars. Discusses the AI strategies of leading economies and assesses the impact of AI on geopolitics. Provides a comprehensive critique of global AI efforts by the UN and African Union while proffering alternative paradigms and frameworks. Presents the enablers, drivers, and strategic framework of AI deployment to achieve the SDGs. Develops and presents details of six distinct but related components of a novel Strategic Framework for developing and adopting AI: Vision, Strategy, Policy, Governance, Legislation, Regulations, and Implementation Matrix. Outlines specific ways that AI can be deployed to achieve each of the 17 SDGs and reviews seven countries' experiences. Explores an innovative, forward-looking, and technology-driven framework for equitable global socio-economic transformation to succeed the SDGs post 2030.

Artificial Intelligence Arthur G.O. Mutambara,2025-04-09 This book presents contextualised and detailed research on Artificial Intelligence AI and the Global South. It examines the key challenges of these emerging and least industrialised countries while proffering holistic and comprehensive solutions. The book then explains how AI, as part of these broad interventions, can drive Global South economies to achieve inclusive development and shared prosperity. The book outlines how countries can swiftly prepare to adopt and develop AI across all sectors. It presents novel national, regional, and continental AI adoption, development, and implementation frameworks. Features Broad non-AI interventions and prescriptions to address Global South challenges. A comprehensive but accessible introduction to AI concepts, technology, infrastructure, systems, and innovations such as AlphaFold, ChatGPT 4, and DeepSeek R1. An overview of AI-related technologies such as quantum computing, battery energy storage systems, 3D printing, nanotechnology, IoT, and blockchain.

How to prepare emerging economies to unlock the benefits of AI while mitigating the risks Discussion of specific AI applications in 11 critical Global South sectors Details of 11 sector case studies of AI adoption in the Global South and Global North Ten country case studies Sharing emergent AI experiences in the Global South AI adoption framework vision strategy policy governance legislation regulation and implementation matrix A framework for democratising and decolonising AI The value proposition for AI research development and ownership in the Global South A case for the participation of the Global South in the AI semiconductor industry This book is aimed at policymakers business leaders graduate students academics researchers strategic thinkers and world leaders seeking to understand and leverage the transformative role of AI based systems in achieving inclusive development economic transformation and shared prosperity The Adoption of Artificial Intelligence and Inertia in Higher Education James Hutson, 2025-10-01 This research monograph explores the complex resistance to integrating Artificial Intelligence AI within higher education institutions Despite the significant potential of AI to enhance education faculty adoption remains inconsistent and is often met with skepticism This book investigates key factors contributing to this resistance such as leadership deficits funding barriers cultural inertia and faculty attitudes toward technological change Drawing on qualitative and quantitative empirical data case studies from U S and international institutions and theoretical analysis the book uncovers underlying concerns about job security and professional identity It points to actionable strategies for overcoming these barriers and will be relevant for scholars researchers advanced students and educators grappling with issues navigating technological integration in academia and with interests in the sociology of education educational technology and higher education administration **Advanced Reactor Concepts (ARC)** Ali Zamani Paydar, Seyed Kamal Mousavi Balgehshiri, Bahman Zohuri, 2023-07-20 Nuclear engineers advancing the energy transition are understanding more about the next generation of nuclear plants however it is still difficult to access all the critical types concepts and applications in one location Advanced Reactor Concepts ARC A New Nuclear Power Plant Perspective Producing Energy gives engineers and nuclear engineering researchers the comprehensive tools to get up to date on the latest technology supporting generation IV nuclear plant systems After providing a brief history of this area alternative technology is discussed such as electromagnetic pumps heat pipes as control devices Nuclear Air Brayton Combined Cycles integration and instrumentation helping nuclear plants to provide dispatchable electricity to the grid and heat to industry Packed with examples of all the types benefits and challenges involved Advanced Reactor Concepts ARC delivers the go to reference that engineers need to advance safe nuclear energy as a low carbon option Describes theory and concepts on generation IV technology such as advanced reactor concepts ARC and electromagnetic pumps and compares different types and sizes Sets out the energy transition with critical carbon free technology that can supplement intermittent power sources such as wind and solar Explains alternative heat storage technology including Nuclear Air Brayton Combined Cycles Introduces advanced main instrumentation systems for in core probes **Mind-Reading and Artificial Intelligence:**

Past, Present and Future Prof. (Dr.) Jai Paul Dudeja, 2024-10-30 Mind reading typically refers to the ability of discerning or interpreting someone else's thoughts, feelings, or intentions. Mind Reading has two components: human-based and ii device-based artificial intelligence. Artificial Intelligence (AI) refers to programming computers to do tasks that normally require human intelligence, like learning, problem-solving, and understanding language. It is like giving computers the ability to think and make decisions on their own, similar to how humans do. AI helps machines learn from data, adapt to new situations, and perform tasks without being explicitly programmed for each step. This book covers the topics on human-based and device-based mind reading and interpretation of artificial intelligence, which is divided into 32 chapters and the following 8 sections: i Mind Reading and Artificial Intelligence Introduction and Overview ii Human Based Mind Reading iii Artificial Intelligence Introduction Types of Learning iv Device Based Mind Reading And Virtual Assistants v Applications and Opportunities of Artificial Intelligence vi Artificial Intelligence Ethical Issues Risks and Regulations vii Artificial Consciousness and viii Artificial Intelligence in India Status and the Way Forward Advanced Computational Intelligence Techniques for Engineers

T. Joshva Devadas, Naveenkumar Jayakumar, N. Narayanan Prasanth, P. Anandhakumar, Shrikant Jadhav, 2025-12-29 This book presents a thorough examination of computational intelligence and its significant influence on solving intricate engineering challenges. It covers fundamental theories as well as advanced applications, illustrating how techniques in computational intelligence are transforming engineering practices. The book is organized into distinct sections, each concentrating on specific engineering domains in which computational intelligence assumes a critical role. The book presents a methodical coverage of computational intelligence principles and techniques, illustrated by examples from various engineering domains. It emphasizes a problem-solving approach, demonstrating how computational intelligence can be used to tackle complex problems. It offers use cases and real-world examples to facilitate targeted learning and understanding and includes discussion on ethical considerations, advocating for the responsible use of technology and consideration of societal impacts. This reference book is for engineers, researchers, and scholars interested in computational intelligence techniques in engineering. **Monthly Catalog of United States Government Publications**, 1995 **Logistics and Digital**

Transformation Marzena Kramarz, Sabina Kauf, 2025-12-05 This comprehensive textbook examines the digital maturity of modern supply chains, presenting innovative frameworks for assessing and enhancing digital capabilities across procurement, production, distribution, and city logistics, while offering forward-looking scenarios for supply chain evolution. **Logistics and Digital Transformation: The Challenges of Modern Supply Chains** leads the reader through the various applications of information and communication technology (ICT) in logistics and suggests how digital logistics systems may develop in the future. These concepts present research conducted at the scale of the entire supply chain as well as at the scale of individual logistics subsystems: supply logistics, production logistics, distribution logistics, and in the area of city/urban logistics, which is closely related to the development of modern distribution systems. Unique to this book is its description of the relationship
