OpenMP: Advanced Task-Based, Device and Compiler Programming Simon McIntosh-Smith, Michael Klemm, Bronis R. de Supinski, Tom Deakin, Jannis Klinkenberg, 2023-08-30 This book constitutes the proceedings of the 19th International Workshop on OpenMP IWOMP 2023 held in Bristol UK during September 13-15 2023. The 15 full papers presented in this book were carefully reviewed and selected from 20 submissions. The papers are divided into the following topical sections: OpenMP and AI Tasking Extensions, OpenMP Offload Experiences, Beyond Explicit GPU Support, and OpenMP Infrastructure and Evaluation. *Optimising the Software Development Process with Artificial Intelligence* José Raúl Romero, Inmaculada Medina-Bulo, Francisco Chicano, 2023-07-19 This book offers a practical introduction to the use of artificial intelligence (AI) techniques to improve and optimise the various phases of the software development process, from the initial project planning to the latest deployment. All chapters were written by leading experts in the field and include practical and reproducible examples. Following the introductory chapter, Chapters 2-9 respectively apply AI techniques to the classic phases of the software development process: project management, requirement engineering, analysis and design, coding, cloud deployment, unit and system testing, and maintenance. Subsequently, Chapters 10 and 11 provide foundational tutorials on the AI techniques used in the preceding chapters: metaheuristics and machine learning. Given its scope and focus, the book represents a valuable resource for researchers, practitioners, and students with a basic grasp of software engineering. *The Handbook of Artificial Intelligence and Journalism* Aynur Sarısakaloğlu, Martin Löffelholz, 2025-12-23 Presents a comprehensive global overview of AI-driven journalism and its transformative impact on media practices. As artificial intelligence (AI) continues to reshape the media landscape, *The Handbook of Artificial Intelligence and Journalism* provides the first comprehensive academic exploration of the intersection between AI technologies and journalism. Edited by Aynur Sarısakaloğlu and Martin Löffelholz, this foundational volume brings together 37 leading scholars from six continents to examine how AI is redefining the structures, practices, and epistemologies of journalism. Organized around key thematic areas, the Handbook investigates the driving forces propelling the algorithmic transformation and unveils emerging trends in journalistic practice and journalism research, moving beyond Western-centric perspectives to incorporate diverse global experiences and knowledge production. Twenty-eight original chapters address systemic shifts such as evolving structures of media organizations, changing roles of actors, transformations in news production routines, and shifting patterns of news consumption. By integrating theoretical, empirical, and practical perspectives, the Handbook sets the stage for a new research agenda for understanding AI-driven journalism on a global scale. Containing rigorous interdisciplinary scholarship and broad geographical coverage, *The Handbook of Artificial Intelligence and Journalism* integrates theoretical foundations, empirical studies, and practical applications in a cohesive structure. Offers insights into journalism practices across a wide range of geographical contexts and engages with approaches that transcend Western-dominated paradigms, incorporating

perspectives from the Global South Employs interdisciplinary frameworks to enhance the understanding of AI driven journalism Examines the sociotechnical dynamics of AI including its potential benefits and challenges for journalism Presents forward looking reflections on the future of journalism research in the AI era The Handbook of Artificial Intelligence and Journalism is ideal for undergraduate graduate and doctoral students in journalism communication and media studies programs It also serves as a vital reference for researchers educators media professionals and policy advisors engaged in digital journalism journalism research media innovation and public communication
