Using Stable Diffusion with Python Andrew Zhu (Shudong Zhu), 2024-06-03 Master AI image generation by leveraging GenAI tools and techniques such as diffusers LoRA textual inversion ControlNet and prompt design in this hands on guide with key images printed in color Key Features Master the art of generating stunning AI artwork with the help of expert guidance and ready to run Python code Get instant access to emerging extensions and open source models Leverage the power of community shared models and LoRA to produce high quality images that captivate audiences Purchase of the print or Kindle book includes a free PDF eBook Book Description Stable Diffusion is a game changing AI tool that enables you to create stunning images with code The author a seasoned Microsoft applied data scientist and contributor to the Hugging Face Diffusers library leverages his 15 years of experience to help you master Stable Diffusion by understanding the underlying concepts and techniques You ll be introduced to Stable Diffusion grasp the theory behind diffusion models set up your environment and generate your first image using diffusers You ll optimize performance leverage custom models and integrate community shared resources like LoRAs textual inversion and ControlNet to enhance your creations Covering techniques such as face restoration image upscaling and image restoration you ll focus on unlocking prompt limitations scheduled prompt parsing and weighted prompts to create a fully customized and industry level Stable Diffusion app This book also looks into real world applications in medical imaging remote sensing and photo enhancement Finally you ll gain insights into extracting generation data ensuring data persistence and leveraging AI models like BLIP for image description extraction By the end of this book you ll be able to use Python to generate and edit images and leverage solutions to build Stable Diffusion apps for your business and users What you will learn Explore core concepts and applications of Stable Diffusion and set up your environment for success Refine performance manage VRAM usage and leverage community driven resources like LoRAs and textual inversion Harness the power of ControlNet IP Adapter and other methodologies to generate images with unprecedented control and quality Explore developments in Stable Diffusion such as video generation using AnimateDiff Write effective prompts and leverage LLMs to automate the process Discover how to train a Stable Diffusion LoRA from scratch Who this book is for If you re looking to gain control over AI image generation particularly through the diffusion model this book is for you Moreover data scientists ML engineers researchers and Python application developers seeking to create AI image generation applications based on the Stable Diffusion framework can benefit from the insights provided in the book AI-Assisted Library Reconstruction Senthilkumar, K.R., 2024-04-03

In an era marked by rapid technological progress libraries find themselves at a crossroads grappling with the challenges posed by an information rich yet digitally fragmented landscape The conventional role of libraries once the steadfast guardians of knowledge faces disruption as we navigate through a sea of information abundance This conundrum gives rise to a critical issue how can libraries adapt and thrive in an environment dominated by the rapid evolution of artificial intelligence AI AI Assisted Library

Reconstruction is a compelling solution that promises to breathe new life into these institutions making them more dynamic accessible and efficient in the face of unprecedented challenges This book addresses the pressing issues faced by libraries in the age of information technology It doesn't merely scratch the surface it delves deep into the heart of the matter providing an exploration of the integration of artificial intelligence in the reconstruction and revitalization of libraries Through an in depth examination of technologies methodologies and applications it offers a guide for libraries to not only survive but thrive in this technologically charged landscape

Artificial Intelligence in Medicine Joseph Finkelstein, Robert Moskovitch, Enea Parimbelli, 2024-07-26 This two volume set LNAI 14844 14845 constitutes the refereed proceedings of the 22nd International Conference on Artificial Intelligence in Medicine AIME 2024 held in Salt Lake City UT USA during July 9 12 2024 The 54 full papers and 22 short papers presented in the book were carefully reviewed and selected from 335 submissions The papers are grouped in the following topical sections Part I Predictive modelling and disease risk prediction natural language processing bioinformatics and omics and wearable devices sensors and robotics Part II Medical imaging analysis data integration and multimodal analysis and explainable AI

Generative AI in Creative Industries Amina Al-Marzouqi, Said Salloum, Khaled Shaalan, Tarek Gaber, Ra'ed Masa'deh, 2025-07-04 This book compiles a comprehensive collection of pioneering research that addresses the multifaceted challenges and theoretical aspects of Generative AI in creative industries Generative AI a groundbreaking technological development has been carving a significant niche within the creative industries This innovative form of AI exemplified by models like OpenAI's ChatGPT is not only transforming the landscape of human like text generation but is also radically reshaping creative fields such as music literature and visual arts In the realm of creative industries Generative AI serves as a catalyst for artistic innovation offering tools for artists to push the boundaries of creativity It assists in composing music generating unique artworks and even writing stories or scripts thereby democratizing the creative process The integration of Generative AI in these industries promises a synergy between human creativity and machine intelligence potentially leading to novel genres and forms of art Despite its transformative potential the incorporation of Generative AI in creative fields is not devoid of challenges Ethical considerations such as authorship rights originality and the impact on traditional creative roles are pivotal Moreover the authenticity and emotional depth of AI generated content compared to human created art is a subject of ongoing debate The book aims to feature original manuscripts encompassing a wide array of topics from the development of new generative technologies and their practical application in creative fields to critical analysis of the ethical legal and cultural implications of these systems By gathering the latest advancements in this field and spotlighting emerging avenues for research this book serves as an invaluable resource and guide for researchers artists and practitioners operating at the intersection of Generative AI and creative industries

Modern Computer Vision with PyTorch V Kishore Ayyadevara, Yeshwanth Reddy, 2024-06-10 The definitive computer vision book is back featuring the latest neural network architectures and an exploration of foundation and diffusion models Purchase of the print or Kindle

book includes a free eBook in PDF format

Key Features

- Understand the inner workings of various neural network architectures and their implementation including image classification object detection segmentation generative adversarial networks transformers and diffusion models
- Build solutions for real world computer vision problems using PyTorch

All the code files are available on GitHub and can be run on Google Colab

Book Description

Whether you are a beginner or are looking to progress in your computer vision career this book guides you through the fundamentals of neural networks NNs and PyTorch and how to implement state of the art architectures for real world tasks

The second edition of *Modern Computer Vision with PyTorch* is fully updated to explain and provide practical examples of the latest multimodal models CLIP and Stable Diffusion

You ll discover best practices for working with images tweaking hyperparameters and moving models into production

As you progress you ll implement various use cases for facial keypoint recognition multi object detection segmentation and human pose detection

This book provides a solid foundation in image generation as you explore different GAN architectures

You ll leverage transformer based architectures like ViT TrOCR BLIP2 and LayoutLM to perform various real world tasks and build a diffusion model from scratch

Additionally you ll utilize foundation models capabilities to perform zero shot object detection and image segmentation

Finally you ll learn best practices for deploying a model to production

By the end of this deep learning book you ll confidently leverage modern NN architectures to solve real world computer vision problems

What you will learn

- Get to grips with various transformer based architectures for computer vision CLIP Segment Anything and Stable Diffusion and test their applications such as in painting and pose transfer
- Combine CV with NLP to perform OCR key value extraction from document images visual question answering and generative AI tasks
- Implement multi object detection and segmentation
- Leverage foundation models to perform object detection and segmentation without any training data points
- Learn best practices for moving a model to production

Who this book is for

This book is for beginners to PyTorch and intermediate level machine learning practitioners who want to learn computer vision techniques using deep learning and PyTorch

It s useful for those just getting started with neural networks as it will enable readers to learn from real world use cases accompanied by notebooks on GitHub

Basic knowledge of the Python programming language and ML is all you need to get started with this book

For more experienced computer vision scientists this book takes you through more advanced models in the latter part of the book

Advanced Information Networking and Applications

Leonard Barolli, 2025-05-17

Networks of today are going through a rapid evolution and there are many emerging areas of information networking and their applications

Heterogeneous networking supported by recent technological advances in low power wireless communications along with silicon integration of various functionalities such as sensing communications intelligence and actuations are emerging as a critically important disruptive computer class based on a new platform networking structure and interface that enable novel low cost and high volume applications

Several of such applications have been difficult to realize because of many interconnection problems

To fulfill their large range of applications different kinds of

networks need to collaborate and wired and next generation wireless systems should be integrated in order to develop high performance computing solutions to problems arising from the complexities of these networks This volume covers the theory design and applications of computer networks distributed computing and information systems The aim of the volume Advanced Information Networking and Applications is to provide latest research findings innovative research results methods and development techniques from both theoretical and practical perspectives related to the emerging areas of information networking and applications

The Political Philosophy of AI Mark Coeckelbergh, 2022-01-31 Political issues people care about such as racism climate change and democracy take on new urgency and meaning in the light of technological developments such as AI How can we talk about the politics of AI while moving beyond mere warnings and easy accusations This is the first accessible introduction to the political challenges related to AI Using political philosophy as a unique lens through which to explore key debates in the area the book shows how various political issues are already impacted by emerging AI technologies from justice and discrimination to democracy and surveillance Revealing the inherently political nature of technology it offers a rich conceptual toolbox that can guide efforts to deal with the challenges raised by what turns out to be not only artificial intelligence but also artificial power This timely and original book will appeal to students and scholars in philosophy of technology and political philosophy as well as tech developers innovation leaders policy makers and anyone interested in the impact of technology on society
