Vahvanen, 2022-02-25. The hymn of Digitalization is nothing new. We must encourage the creation of new apps. We must develop AI in order to prevail among international competition. Technology's advance will halt climate change and let robots do the dumb stuff for us. Our faith in technology is powerful because it has saved us in the past. *The Almighty Machine* shows us technology's flip side. The things that once powered us toward a brighter tomorrow are already undermining our quality of life. The data stream has shattered our concentration; human relationships have been reduced to a menu of emojis; constant surveillance has nullified much of our privacy; and the development of AI could be the beginning of the end for us. We are becoming the casualties of our own success. Pekka Vahvanen's bristling and timely critique, deftly translated by Mark Jones, throws doubt on the necessity of technological development in a world saturated in tech. *The Almighty Machine* presents an important question: Does progress no longer make us happier? Artificial Intelligence as an Additional Tool in Customer Relationship Management and the Impact after the COVID-19 Crisis Leonard Rupperti, 2022-12-16. Masterarbeit aus dem Fachbereich Informatik. K nstliche Intelligenz. Sprache: Deutsch. Abstract: The aim of the research of this present work is to answer which criteria make an AI-driven CRM successful, what opportunities and challenges there are, and how the general population assesses this topic. Furthermore, it is important to see that the corona pandemic is having an impact on the use of AI. For this purpose, the following two research questions were asked: How does AI strengthen the customer relationship CRM? Will the Corona pandemic accelerate the use of AI? To answer the research questions, a quantitative study on people's current opinions and attitudes towards AI and how it will change as a part of the outbreak of the pandemic was conducted. Specifically, the study deals with artificial intelligence in customer service, the change of AI in companies due to Covid 19, and how people generally view the topic of AI. The participants surveyed were anonymous, of different age groups, occupations, and origins, as this topic affects everyone today, and it is important to pay attention to the opinion of the general population. The targeted use of artificial intelligence in customer relationship management to make the work of companies and their employees more efficient and of higher quality, also about the customer, is on the rise. More and more sales are generated by this technology, and more and more AI-controlled tools are being developed, which make customer management more successful and thus intensify the relationship between customers and companies. Thus, it is necessary to understand such

technologies and how they are designed but also what opinion the general society has on this rather revolutionary technology
