 Regan,2025-12-11 How do we fall in love in the 21st century In Dating Apps Modern Romance and Social Inequality Hannah
 Regan explores the impact dating apps have had on how we meet potential partners and decide who to date In particular
 Regan considers our tendency to fall in love with people who are very similar to us and how dating apps both facilitate this
 preference and challenge us to think outside the box By sharing the stories of dating app users the book raises important
 questions about how social inequality exists in our intimate lives and how technology reinforces these long held social beliefs

This book situates current patterns of dating and relationships within the historical context of courtship to explore how the introduction of new technology has changed romantic partnerships Despite these new possibilities the analysis encourages us to question whether dating is in fact changing or whether we are simply enacting the same old social patterns in new ways Challenging the assumptions which shape dating preferences in turn challenges the social structures of power and inequality which underlie them
