YouTube Jean Burgess, Joshua Green, 2018-08-28 Since launching as a website for everyday video sharing in

2005 YouTube has become one of the world's most powerful digital media platforms. Originally published in 2009 when YouTube was only four years old, this book was the first to systematically investigate its cultural impacts and politics, highlighting the productive tensions between its amateur community rhetoric and its commercial media logics. Since then, YouTube has grown as a platform and matured as a company. Its business model is built on coordinating the interests of and extracting value from its content creators, audiences, advertisers, and media partners in a commercial setting where YouTube now competes with other powerful social media and streaming television platforms. Meanwhile, YouTube's diverse communities of content creators, who developed the platform's most distinctive cultural forms and genres, have strong ideas and interests of their own. While preserving the original edition's forensic analysis of YouTube's early popular culture and uses, this fully revised and updated edition weaves fresh examples, updated theoretical perspectives, and comparative historical insights throughout each of its six chapters. Burgess and Green show how, over its more than a decade of existence, YouTube's dual logics of commerciality and community have persisted, generating new genres of popular culture, new professional identities, and business models for the media industries, and giving rise to ongoing platform governance challenges. The book is essential reading for anyone interested in the contemporary and future implications of digital media platforms and will be particularly valuable for students and scholars in media communication and cultural studies.

Global Communication Thomas L. McPhail, Steven Phipps, 2019-10-11. Discusses the players, theories, and trends that affect how the world communicates and gets their information. This book is a definitive text on multinational communication and media conglomerates, exploring how global media influences both audiences and policy makers around the world. Comprehensively updated to reflect the many fast-moving developments associated with this dynamic field, this new edition investigates who and where certain cultural products are coming from and why, and addresses issues and concerns about their impact all over the world. Global Communication: Theories, Stakeholders, and Trends, 5th Edition, has been thoroughly updated with new content, trends, and conclusions, all based on the latest data. The book examines broadcasting, mass media, and news services ranging from MSNBC, MTV, and CNN to television sitcoms and Hollywood export markets. It investigates the roles of the major players such as News Corp, Sony, the BBC, Disney, Bertelsmann, Viacom, and Time Warner, and probes the role of advertising and the Internet and their ability to transcend national boundaries and beliefs. New chapters look at the growing importance and significance of other major regions such as the media in the Middle East, Europe, and Asia. Outlines the major institutions, individuals, corporations, technologies, and issues that are altering the international information telecommunication and broadcasting order. Focuses on a broad range of issues, including social media and new services like Netflix, as well as Arab and Asian media. Includes major updates on discussion of the Internet to incorporate global events over the last few years, such as Russian use thereof, Facebook, Google. Looks at how streaming services such as Netflix, Amazon, Spotify, and more have emerged as dominant players in world entertainment. Offers an updated instructor's website.
