The Digital Dystopias of Black Mirror and Electric Dreams Steven Keslowitz, 2020-01-07 This critical examination of two dystopian television series Black Mirror and Electric Dreams focuses on pop culture depictions of technology and its impact on human existence Representations of a wide range of modern and futuristic technologies are explored from early portrayals of artificial intelligence Rossum's Universal Robots 1921 to digital consciousness transference as envisioned in Black Mirror's San Junipero These representations reflect societal anxieties about unfettered technological development and how a world infused with invasive artificial intelligence might redefine life and death power and control The impact of social media platforms is considered in the contexts of modern day communication and political manipulation *American Film Festival*, 1980 *Advertising in the Digital Age* Sevil Yesiloglu, Joyce Costello, 2024-04-09 Advertising is everywhere Whether you realise it or not it's there when you watch your favourite Netflix show when you scroll through Instagram and when you search on Google What's more advertisers are becoming more savvy than ever using new technologies to target adverts to you specifically So what are we to make of all this This book will equip you with a thorough understanding of today's media environment and how online advertising differs from traditional offline models In an age of influencers big data AI and social media the world of advertising looks very different from how it did a generation ago You will learn not only about various types of advertising but also about its impact on viewers from our buying habits to possible harm Tying theory and concepts to practice this volume is the ideal complement to courses in advertising digital media and communication and will enable you to form a clear picture of the reality of working across promotional media industries **The (Dis)Order of U.S.**

Schooling Eric Ferris, 2023-06-01 This book critically interrogates the function of schooling in the United States of America using the writings of sociologist Zygmunt Bauman Asking whether the function is to produce citizens workers a combination of the two or something altogether different it argues that the designs of schooling are part of a carefully crafted ordering illustrated via an analysis of the ways in which schooling introduces students to various forms of coercion and seduction that socialize students in particular ways ways that support an order By engaging with the prolific and insightful works of one of the most prominent social thinkers of the 21st century this book considers schooling and its contributions to order Be they solid or liquid modern ordering mechanisms ordering through repression and seduction or supporting ordering through the creation of boundaries separating an orderly inside from its disorderly outside schools imperfectly support the construction of order and in doing so privilege some representations and individuals over others To order is to harness ambivalence and steer it in directions that privilege the in group at the expense of the out group and schools from the curriculum they teach to the values and ideas they promote are desirable captive marketplaces instrumental in steering this ambivalence The author ultimately suggests that the function of schools whether recognized or not are not so much to educate students to be free thinkers but rather to be orderly cogs in a particular functional social machine As such the book will be of interest to faculty
