How Do I Ai Content Repurposing Usa:

Emerging Technologies and Information Systems for the Knowledge Society Miltiadis D. Lytras, John M. Carroll, Ernesto Damiani, Robert D. Tennyson, 2008-09-20 It is a great pleasure to share with you the Springer LNCS proceedings of the First World Summit on the Knowledge Society WSKS 2008 that was organized by the Open Research Society NGO <http://www.openknowledge.society.org> and took place in the American College of Greece <http://www.acg.gr> during September 24-27, 2008 in Athens, Greece. The World Summit on the Knowledge Society Series is an international attempt to promote a dialogue on the main aspects of a knowledge society toward a better world for all based on knowledge and learning. The WSKS Series brings together academics, people from industry, policy makers, politicians, government officers and active citizens to look at the impact of information technology and the knowledge-based era it is creating on key facets of today's world: the state, business, society and culture. Six general pillars provide the constitutional elements of the WSKS series: Social and Humanistic Computing for the Knowledge Society; Emerging Technologies and Systems for the Society and Humanity; Knowledge Learning Education; Learning Technologies and E-learning for the Knowledge Society; Information Technologies; Knowledge Management Systems; E-business and Enterprise Information Systems for the Knowledge Society; Culture and Cultural Heritage Technology for Culture Management; Management of Tourism and Entertainment; Tourism Networks in the Knowledge Society; Government and Democracy for the Knowledge Society; Research and Sustainable Development in the Knowledge Society. The summit provides a distinct, unique forum for cross-disciplinary fertilization of research favoring the dissemination of research that is relevant to international research. *Managing the Drug Discovery Process* Susan Miller, Walter Moos, Barbara Munk, Stephen Munk, Charles Hart, David Spellmeyer, 2023-03-09 *Managing the Drug Discovery Process* Second Edition thoroughly examines the current state of pharmaceutical research and development by providing experienced perspectives on biomedical research, drug hunting and innovation, including the requisite educational paths that enable students to chart a career path in this field. The book also considers the interplay of stakeholders: consumers and drug firms with respect to a myriad of factors. Since drug research can be a high-risk, high-payoff industry, it is important to students and researchers to understand how to effectively and strategically manage both their careers and the drug discovery process. This new edition takes a closer look at the challenges and opportunities for new medicines and examines not only the current research milieu that will deliver novel therapies but also how the latest discoveries can be deployed to ensure a robust healthcare and pharmacoeconomic future. All chapters have been revised and expanded with new discussions on remarkable advances including CRISPR and the latest gene therapies, RNA-based technologies being deployed as vaccines as well as therapeutics, checkpoint inhibitors and CAR-T approaches that cure cancer, diagnostics and medical devices, entrepreneurship and AI. Written in an engaging manner and including memorable insights, this book is aimed at anyone interested in helping to save countless more lives through science. A valuable and compelling resource, this is a must.
