**Chronology of Eclipses and Comets AD 1-1000** Derek Justin Schove, Alan Fletcher, 1984      **Chronology of eclipses and comets** Alan Fletcher, 1987      **The Ethical Dimensions of Global Change** Barry Holden, 2016-07-27 We are currently in a period of rapid global change that is of profound importance but the nature of which is difficult to comprehend. A crucial element in any such comprehension must be an understanding of its ethical dimension since ethical ideas enter into the structure of international orders. Particular ethical questions are also of course of great intrinsic interest and importance. This book covers both aspects through an analysis of key concepts and issues.      [The Chronicle of Ireland: Introduction, text](#) T. M. Charles-Edwards, 2006 The Chronicle of Ireland is the principal source for the history of events not only in Ireland itself but also in what is now Scotland up to 911. It incorporated annals compiled on Iona up to c 740, a monastery which played a major role in the history of Ireland of the Picts to its east and from 635 to 664 of Northumbria. Up to c 740 the Chronicle is thus a crucial source for both Ireland and Britain and from c 740 to 911 it still records some events outside Ireland. The text of the Chronicle is best preserved in the Annals of Ulster but it was also transmitted through chronicles derived from a version made at the monastery of Clonmacnois in the Irish midlands. This translation is set out so as to show at a glance what text is preserved in both branches of the tradition and what is in only one. Newburn, M. Neugebauer, Jürgen H. Rahe, 1991-04-30 In Part Based on Reviews Presented at the 121st Colloquium of the International Astronomical Union held in Bamberg, Germany, April 24-28, 1989.      **A Handbook of Dates** C. R. Cheney, Michael C. E. Jones, 2000-04-06 A Handbook of Dates is an unrivalled reference book for historians. It provides in clear, user-friendly form tables which allow the calculation of the dates and days on which historical events have fallen or will fall from AD 500 to 2100. It describes the calendars and other systems used for dating purposes in England from Roman times to the present, including regnal years. Lists of Easter dates, saints' days, popes, rulers of England and the Roman calendar are also given. In this updated and expanded edition, edited by Professor Michael Jones, the introductory materials for each set of tables has been revised. New tables for legal chronology, old and new style dates, Celtic Easter, adoption of Gregorian style and the French Revolutionary calendar have been added, while the existing Anglo-Saxon regnal lists have been significantly revised. A Handbook of Dates is an essential tool for all researchers in British history.      *Exploring Ancient Skies* David H. Kelley, Eugene F. Milone, 2011-02-16 Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope.

The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean the Far East and the New World particularly Mesoamerica putting the ancient astronomical materials into their archaeological and cultural contexts The authors begin with an overview of the field and proceed to essential aspects of naked eye astronomy followed by an examination of specific cultures The book concludes by taking into account the purposes of ancient astronomy astrology navigation calendar regulation and not least the understanding of our place and role in the universe Skies are recreated to display critical events as they would have appeared to ancient observers events such as the supernova of 1054 A D the lion horoscope and the Star of Bethlehem Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation It will be useful as a reference for scholars and as a text for students in both astronomy and archaeology and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history

The Antiquaries Journal, 2000

*The Lost Millennium* Florin Diacu, 2005 A chance conversation at a conference in Mexico started mathematician Florin Diacu on an amazing journey to make sense of one of the strangest and if true most revolutionary theories you ll ever encounter To understand how scientists could be sceptical about what year it is Florin Diacu explores the fascinating history of chronology from Egyptian horoscopes to the work of Isaac Newton with cameos by Voltaire and Edmund Halley making the startling discovery that our calendar is far from ironclad It all depends rather on the dating of ancient events about which there is real controversy At once accessible and profound The Lost Millennium examines the arguments of present day chronological revisionists such as the Russian scholar Anatoli Fomenko who claims that our system of dating is horribly askew Fomenko cites evidence from ancient astronomy linguistics and cartography and a crucial manuscript by Ptolemy staking his scientific prestige on a theory so controversial that it will change the way you think about time history and the calendar on your wall
