Chained to the Desk in a Hybrid World Bryan E. Robinson, 2023-05-02 A step by step guide to reestablishing work life balance Americans love a hard worker The employee who toils eighteen hour days and eats meals on the run between appointments is usually viewed with a combination of respect and awe But for many this lifestyle leads to family problems a decline in work productivity and ultimately physical and mental burnout Intended for anyone touched by what Robinson calls the best dressed problem of the twenty first century Chained to the Desk in a Hybrid World provides an inside look at the impact of work stress on those who live and work with workaholics partners spouses children and colleagues as well as the appropriate techniques for clinicians who treat them This groundbreaking book builds on the research included in three previous editions of Chained to the Desk from the best selling author and widely respected family therapist Bryan E Robinson In the wake of the COVID 19 pandemic and the rise of working from home Robinson finds that the agonies of work stress have only become more challenging Recent years have seen an unprecedented shift to remote work which has made it significantly harder to maintain the already delicate work life balance weakened as it is by smartphones and other technology The result is that many workaholics are more stressed and burnt out than ever before in their work despite being constantly in the presence of family Chained to the Desk in a Hybrid World both counsels and consoles It provides a step by step guide to help readers spot understand and ultimately recover from workaholism

Business Transformation Richard Kelly, 2022-03-17 This book is a practical guide for business professionals to develop and improve business intelligence and collective decision making within their organisation. It proposes a progressive reconfiguration of the traditional business operating system using a nature inspired framework called swarm facilitation that enables and facilitates collective decision making. Organisations have followed the same rigid formula of problem solving and decision making for over 100 years. It is dominated by centralised governance and pyramid decision making. Such an approach is no longer fit for purpose in an environment of employee disengagement, artificial intelligence, AI, superintelligence and Covid 19 fallout. By the end of this book, readers will be able to solve organisational problems and challenges collectively using swarm intelligence, upgrade and future proof business operating systems to reflect a more collective decision making approach fit for the new connected economy, and Industry 4.0 embrace mindsets that support people working in a more networked, self-organising and collective environment. The book is important reading for leaders and managers who are focused on building organisational capital and engagement and gaining value from the emerging technology by evolving their business operating system into a digital ecosystem as part of an ongoing digital transformation strategy. It will also appeal to experts working in the field of organisational change and development both within the organisation and as consultants.

Managing Health Sciences Libraries in a Time of Change Claire B. Joseph, Priscilla L. Stephenson, 2024-01-26 Selected as a 2025 Doody's Core Title. In *Managing Health Sciences Libraries in a Time of Change*, experienced leaders of the medical library community present insights into the current trends and issues faced by health sciences librarians and offer practical guidelines and management skills needed to create a culture of excellence. The Medical Library Association points out that management skills and a leader's abilities affect the culture and performance of coworkers and the effectiveness of an institution. The last decades have resulted in a sea change for health sciences library leadership and management. In a short period of time, medical libraries have transformed from collections of print books and journals to databases of digital resources accessible from any desktop. Library services no longer must be provided face to face, but the need for virtual library services has grown in complexity and now demands a greater knowledge of technology and informatics. Reference service, instruction, cataloging and collection development all remain as key library tasks, but they have been transformed in this digital environment. This book explores what it means to be a manager of health sciences libraries today. Chapters focus on current trends in health science library leadership, managing change, staffing, issues, managing for diversity, equity and inclusion, mentoring, accreditation and evaluation, leadership skills, and a discussion of the differences between the concepts of leadership and management.
