*Beginning Your Counseling Career* Mary Olufunmilayo Adekson, 2020-02-21 *Beginning Your Counseling Career* provides a comprehensive overview of the counseling profession and equips students with the clinical and administrative skills they need to progress in the field. Helpfully organized into five sections, the text addresses basic career considerations and preparatory aspects of the profession as well as a range of topics to help students broaden their focus on professional development. Chapters cover areas including online masters and doctoral programs, developing a counseling identity, mentoring students for private practice, supporting minority students in counseling programs, considerations for international students, special education legislation, and more. Suitable for students taking preliminary courses in counseling as well as practicum and internship classes, *Beginning Your Counseling Career* offers a detailed and up-to-date framework for aspiring professional counselors at both masters and doctoral levels.

*Starting Out Right* Si Millican, 2012-08-09 *Starting Out Right* *Beginning Band Pedagogy* is the only complete resource for organizing, planning, and teaching beginning woodwind, brass, and percussion students. The book covers every aspect of teaching beginning band students, from the first sounds on the instruments through the first full band performances. It is the only comprehensive reference that offers step-by-step guidelines for teaching each beginning band instrument as well as organizing and running a successful beginning band program. Based on the public school teaching experience of the author, the book is designed for use in undergraduate methods and pedagogy classes as well as for clinics and workshops at the undergraduate and graduate levels. This book is also designed to be a reference for the many novice teachers who lead beginning bands or those teachers whose expertise is not in the band realm. While the focus of the book is on teaching beginning band, much of the book can be of use to band instructors at any grade level. The book is divided into several parts which cover the sound-to-sign to theory approach to teaching musical literacy, child development as it relates to teaching music, recruiting and retaining students, developing fundamental sounds and skills on each woodwind, brass, and percussion instrument, teaching students to read tonal and rhythmic music notation, and selecting and rehearsing beginning band solo, ensemble, and full band music. The book also addresses curriculum design, scheduling, and staffing of band programs. Ideas about managing student records, inventory, and equipment are also given special attention. Written in a casual narrative style, the book features real-world examples of how the principles in the book might be applied to actual teaching situations. Another special feature of the book is a set of early field experience application exercises. *Starting Out Right* guides readers as they explore a comprehensive individual and ensemble approach to teaching each woodwind, brass, and percussion instrument.

*Virtual Services in the Health Sciences Library* Amanda R. Scull, 2022-05-15 Selected as a 2025 Doody's Core Title, virtual services have been part of health sciences libraries for a long time in various forms, including the provision of reference and research services via email or chat, availability of online instruction, access to electronic materials, and the curation of virtual research guides. But when the

COVID 19 pandemic forced many libraries to close their doors and pivot to virtual services almost overnight. Moving all services remote even for just a short time did highlight what worked well and what did not. The situation increased visibility of these services and made patrons more aware of what was available perhaps making them more likely to expect and use those services in the future. In some ways the pandemic showed us ways in which virtual services could even be better than in person services for providing prompt patron services. The situation increased visibility of existing services making users more aware of what was available and revealed gaps and needed improvements in virtual services. In this book copublished by the Medical Library Association librarians from academic to hospital health sciences libraries from rural to urban areas and across a range of service specialties provide blueprints and best practices for building and maintaining sustainable virtual services in health sciences libraries. Each chapter in this volume addresses aspects of providing virtual services in information and access services reference and instruction collections and clinical services written by contributors who have been involved in this work in their own libraries. Whether you are just beginning an implementation assessing and refining current offerings or strategizing for sustainability and looking to the future this book will provide practical advice tools and considerations for maximizing user engagement and satisfaction with virtual library services and resources.
