Cash Operations Management Profits From Within:

Cash Operations Management Gerald R. Sinn, 1980 OPERATIONS MANAGEMENT AND STRATEGIES IN TRAVEL INDUSTRY CUNEYT MENGÜ, Ph.D., 2020-11-01

When overseas travel agency owners and directors predominantly from Middle Eastern countries visited my Istanbul office and saw my Travel Management book published in 2018 in Turkish, they insisted that I publish the same book in English. These comments made me excited and encouraged to publish the book in English with some revisions and additions.

Travel and tourism industry is one of the world's largest industries and a dynamic engine of economic development of the countries. It is a great source of income and employment for countries that receive more international tourists. For this reason, the countries have increased their investment in the travel and tourism industry. Tour operators and travel agencies have the major role for the development of tourism. Their business has vastly changed in the past 20 years. They have to continuously adapt and redefine their roles to the changing environment and technology. As a result of this change, different approaches in management operation and marketing strategies in the travel industry have emerged. From tourism products and services to operation and destination management, from management functions to the distribution channels, from reservation systems to marketing functions, almost all travel concepts have changed shape. In travel agency business, besides the traditional classical system used for many years, neoclassical system and modern contemporary systems such as online travel agencies (OTAs) and destination management companies (DMCs) have emerged. Intermediaries diversified and increased. Pursuant to these developments, travel operators who can keep up with these changes have created a wide academic and practical concept, theoretical discussions, and most importantly, different industrial structures.

This book provides a wide perspective with modern concepts to the operation management and marketing strategies in travel industry, and it is divided into 12 chapters. Each chapter starts with learning outcomes. Basic principles and concepts of subjects are mentioned both theoretically and practically, supported by tables, graphs, and figures for a better understanding of specific chapters.

Production & Operations Management Upendra Kachru, 2009

This book takes a pedagogical approach that is participative and interactive, involving the case study method of learning. Chapters start with an Indian case study of a well-known company. This is used as a capstone case for the chapter. The student will find this an easy learning experience as data and additional information for these enterprises is readily available. The selection of such cases makes classroom learning truly suited to the Indian business environment. The value-driven approach to Operations Management is used in structuring the text into three modules. The first module discusses the infrastructure function of Operations Management. Infrastructure function is considered to be product, process, capacity, and location. Module Two describes the structure of the operations function. This includes quality and other product transformation processes. Module Three focuses on the organization, people, and processes, i.e., the job, the work, and the workplace. In addition, most of the mathematical techniques have been separated into supplements attached to the relevant chapters. Software solutions for

the techniques have been explained in the text Every mathematical technique is exemplified with a number of solved problems Unlike many Production and Operations Management texts this book covers E commerce Industrial Safety Maintenance Environmental Management Green Productivity and new technological trends in the discipline These sections should add to the significance of exploring how firms can gain competitive advantage and promote sustainable development at the same time The last section of the book comprises of a selection of cases from The Indian Institute of Management at Ahmedabad The cases encompass the entire spectrum of Indian Industry the private and the public sectors professional and family managed business organizations service and manufacturing industries single industry and conglomerates The cases relate to Operations Strategy Supply Chain Management Capacity Planning New Products Manufacturing Technologies etc The Case Studies are of world class Prof Tirupati one of the authors of the case studies according to Management Science has penned one of the top 100 management articles in the 50 years The book is comprehensive lucid and easy to read and understand It should be of great value both to students and faculty
