as visual methodology offers a timely analysis of the use of drawings in qualitative research Drawing can be a method in itself as in the research area of Visual Studies and also one that complements the use of photography video and other visual methodologies This edited volume is divided into two sections The first section provides critical commentary on the use of drawings in social science research addressing such issues of methodology as the politics of working with children and drawing ethical issues in working with both adults and children and some of the interpretive considerations The second section in its presentation of nine research based case studies illustrates the richness of drawings Each case study explores participatory research involving drawings that encourages social change or illustrates participant resilience These case studies also highlight the various genres of drawings including cartoons and storyboarding The book draws on community based research from a wide variety of contexts most in South Africa although it also includes work from Rwanda and Lesotho

Given the high rates of HIV AIDS in sub Saharan Africa it should not be surprising that many of the chapters take up concerns such as the preparation of teachers and community health workers in the age of AIDS and the experiences of orphans and vulnerable children Moving further afield this book also includes work done with immigrant populations in Canada and with tribunals in Somalia and Australia Picturing research is an important resource for novice and experienced researchers interested in employing qualitative methodology that encourages rich yet low tech visible data and that offers a participatory enabling experience for participants and their communities

The Frighteners Peter Laws, 2018-09-25 The Frighteners is a bizarrely compelling laugh out loud exploration of societies fascination with the dark spooky and downright terrifying side of life The author self proclaimed sinister minister opens the book by reflecting on how he went from a horror obsessed atheist to a God fearing Christian and then reconciled his love of the macabre with his new faith In the chapters that follow Laws takes us on a worldwide romp to shine light on the dark corners of our own minds An American hell house controversial Christian haunted houses that act out the horrors of abortion drug use etc hosts his reflection on the use of horror in religion A party in London with real life vampires exemplifies modern sexual fascination with the parasitic undead He goes ghost hunting in an underground barbershop where a murderer used to cut hair A professor in Denmark who is an expert on the recent Slenderman court case helps him explore the link between technology and the supernatural In accessible and light hearted prose Peter Laws takes us from the dark corners of his mind to the underbelly of various macabre cultures to illuminate society s preoccupation with death and horror The Frighteners combines psychology religious theory and personal memoir to create a dynamic and fascinating read that is informative and entertaining

Finance Fictions Rebecca A. Adelman, 2018-11-20 In the United States the early years of the war on terror were marked by the primacy of affects like fear and insecurity These aligned neatly with the state s drive toward intensive securitization and an aggressive foreign policy But for the broader citizenry such affects were tolerable at best and unbearable at worst they were not sustainable Figuring Violence catalogs the affects that define the latter stages of this war and the imaginative work that underpins them These affects apprehension affection admiration gratitude pity and righteous anger are far more subtle and durable than their predecessors rendering them deeply compatible with the ambitions of a state embroiling itself in a perpetual and unwinnable war Surveying the cultural landscape of this sprawling conflict Figuring Violence reveals the varied mechanisms by which these affects have been militarized Rebecca Adelman tracks their convergences around six types of beings civilian children military children military spouses veterans with PTSD

and TBI Guant namo detainees and military dogs All of these groups have become preferred objects of sentiment in wartime public culture but they also have in common their status as political subjects who are partially or fully unknowable They become visible to outsiders through a range of mediated and imaginative practices that are ostensibly motivated by concern or compassion However these practices actually function to reduce these beings to abstracted figures silencing their political subjectivities and obscuring their suffering As a result they are erased and rendered hypervisible at once Figuring Violence demonstrates that this dynamic ultimately propagates the very militarism that begets their victimization **9/11 Culture** Jeffrey Melnick, 2009-04-06 With a broad purview that includes film music literary fiction and other popular arts the volume is designed for anyone interested in quietly probing how American cultural agents and audiences have acted out and worked through the national trauma of 9 11 Back cover **Encountering Children's Literature** Jane M. Gangi, 2004 In this text Jane M Gangi gives us a new perspective on how integrating the fine arts and literature fosters the active participation and in depth understanding that is as important for children as it is for teachers The heart of the book is a comprehensive treatment of children s literature with a strong emphasis on multicultural and international literature Jaquette **Senior High Core Collection** Raymond W.
