With a taut poetic style Lippit produces speculative readings of secret and shadow archives and visual structures or phenomenologies of the inside charting the materiality of what both can and cannot be seen in the radioactive light of the twentieth century *It Came from 1957* Rob Craig, 2013-10-09 America in the 1950s was a cauldron of contradictions Advances in technology chafed against a grimly conservative political landscape the military industrial complex ceaselessly promoted the Communist menace young marrieds fled crumbling cities for artificial communities known as suburbs and the corporate cipher known as The Organization Man was created along with stifling images of women The decade huddled under the fear of nuclear holocaust was also dedicated to all things futuristic Science fiction was in its salad days in magazines and novels and in motion pictures trying every trick in the book to lure customers back from television including reliance on monster movies All of these forces collided in 1957 when an astounding 57 movies of the science fiction horror and fantasy variety were shown in the United States a record unmatched to this day Reflecting some of the socio political topics of the day several are exceptional examples of their genres This book critically discusses each of the films *Tense Future* Paul K. Saint-Amour, 2015-03-02 Can the threat of violence be a form of violence *Tense Future* argues that it can In a series of groundbreaking readings Saint Amour shows how interwar writers faced the injurious prospect of total war how some wrote tomes to rival war in scale and others conceded war's inevitability while refusing to call for a politically regressive peace **Secret Weapons and World War II** Walter E. Grunden, 2005 Grunden's analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan's failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to
