Day The Sky Split Apart Cosmic Mystery Of The Century:

The Day the Sky Split Apart Roy A. Gallant,1995 **Tunguska** Andy Bruno,2022-06-30 In 1908 thunderous blasts and blazing fires from the sky descended upon the desolate Tunguska territory of Siberia The explosion knocked down an area of forest larger than London and was powerful enough to obliterate Manhattan The mysterious nature of the event has prompted a wide array of speculation and investigation including from those who suspected that aliens from outer space had been involved In this deeply researched account of the Tunguska explosion and its legacy in Russian society culture and the environment Andy Bruno recounts the intriguing history of the disaster and researchers attempts to understand it Taking readers inside the numerous expeditions and investigations that have long occupied scientists he foregrounds the significance of mystery in environmental history His engaging and accessible account shows how the explosion has shaped the treatment of the landscape how uncertainty allowed unusual ideas to enter scientific conversations and how cosmic disasters have influenced the past and might affect the future **Psalms, the Journey Begins** Mark Correll,2006-11

Fire in the Sky Gordon L. Dillow,2020-08-04 This accessible and always entertaining Booklist combination of history pop science and in depth reporting offers a fascinating account of the asteroids that hit Earth long ago and those streaming toward us now as well as how prepared we are against asteroid caused catastrophe One of these days warns Gordon Dillow the Earth will be hit by a comet or asteroid of potentially catastrophic size The only question is when In the meantime we need to get much better at finding objects hurtling our way and if they re large enough to penetrate the atmosphere without burning up figure out what to do about them We owe many of science s most important discoveries to the famed Meteor Crater a mile wide dimple on the Colorado Plateau created by an asteroid hit 50 000 years ago In his masterfully researched Fire in the Sky Dillow unpacks what the Crater has to tell us Prior to the early 1900s the world believed that all craters on the Earth and Moon were formed by volcanic activity Not so The revelation that Meteor Crater and others like it were formed by impacts with space objects has led to a now accepted theory about what killed off the dinosaurs and it has opened up a new field of asteroid observation that is brimming with urgency Dillow looks at great asteroid hits of the past and modern day asteroid hunters and defense planning experts including America s first Planetary Defense Officer Satellite sensors confirm that a Hiroshima scale blast occurs in the atmosphere every year and a smaller one kiloton blast every month While Dillow makes clear that the objects above can be deadly he consistently inspires awe with his descriptions of their size makeup and origins Both a riveting work of popular science and a warning to not take for granted the space objects hurtling overhead Fire in the Sky is ultimately a testament to our universe s celestial wonders **Comets, Asteroids, and**

Meteorites Roy A. Gallant,2001 An introduction to the celestial phenomena of asteroids meteoroids and meteorites and comets Forthcoming Books Rose Arny,1995 The Tunguska Fireball Surendra Verma,2005 At 7 14 a m on 30 June 1908 a huge fireball exploded in the Siberian sky A thousand times the force of the hiroshima bomb it flattened an area of

remote Tunguska forest bigger than Greater London forming a mushroom cloud that almost reached into space What was it A century on and no one knows for sure Suspects range from comets or mini black holes into the realms of science fiction and conspiracy a laser beam fired by extra terrestrials or an early nuclear experiment This is an exhilarating ride around one of science's greatest mysteries

Killer Rocks from Outer Space Steven N. Koppes, 2004-01-01 Describes the role that collisions with meteors comets and asteroids have played in the history of Earth and other planets in the solar system and examines what is being done to protect Earth from future collisions

Science, Technology, and Society, 2002 Examines scientific discoveries and developments within their historic context showing how social trends and events influenced science and how scientific developments changed people's lives

Atlantis, the Mammoth, and the Flood Riddick Dawson, 2025-10-08 Atlantis The Mammoth and the Flood is an extraordinary journey through myth science and memory an epic that unites the lost world of Plato's Atlantis with the frozen giants of the Ice Age and the great flood legends that echo across civilizations Moving from the tundras of Siberia to the depths of the Atlantic the narrative uncovers how humanity has always sought to explain catastrophe from the bones of mammoths mistaken for buried dragons to the drowned continents remembered in sacred texts and ancient maps Through vivid storytelling and rich historical reconstruction this book traces how folklore geology and archaeology intertwine It explores the forgotten ivory trade that first revealed mammoth remains to the modern world the scientific revolutions of Cuvier and Lyell and the enduring tension between faith and evidence in the age old debate over the Flood At its heart lies a haunting question were the tales of Atlantis and the Deluge distant memories of real events of a world that froze flooded and fell into silence Blending scientific insight with mythic resonance Atlantis The Mammoth and the Flood restores the grandeur of deep time to the human story It is both an elegy for lost worlds and a revelation of how the earth itself preserves its own myths written not in ink but in bone ice and stone

Sound / image Sarah Cardwell, Jonathan Bignell, Lucy Fife Donaldson, 2022-04-26 An exciting new strand in The Television Series the Moments in Television collections celebrate the power and artistry of television whilst interrogating key critical concepts in television scholarship Each Moments book is organised around a provocative binary theme Sound image reassesses the synergy between televisual images and sounds and music as a key creative interaction warranting closer attention Through close scrutiny of visual and sonic elements the book's chosen programmes are persuasively illuminated in new ways The book explores an eclectic range of TV fictions dramatic and comedic Contributors from diverse perspectives come together to expand and enrich the kind of close analysis most commonly found in television aesthetics Sustained detailed programme analyses are sensitively framed within historical technological institutional cultural creative and art historical contexts

Redemption Nicholas Roumas, 2025-08-05 A bold trailblazing investigation into soteriology approached by way of

Girardian mimetic theory and Eastern Orthodox theological reflection *Redemption A Mimetic Soteriology* brings French literary critic Ren Girard's mimetic theory of human behavior together with a breadth of Christian approaches to redemption through the Cross. Girard's mimetic understanding of sacrifice is drawn upon to illuminate biblical narratives about redemption as well as the theologies of Anselm of Canterbury, Peter Abelard, and Gregory of Nyssa. Nicholas Roumas shows by these readings that redemption can be understood as a reconfiguration of symbolic values with profound consequences for human relations and social organization. Redemption thus serves theologians as a basis for a new practical dogmatics. This exploration is a breath of fresh air in Orthodox theology, utilizing patristic and scriptural sources outside the framework of the predominant neo-Patristic synthesis and introducing an entirely new modern paradigm onto the Orthodox scene. For theologians of other traditions, *Redemption* contributes to the library of Girardian theologies; its first Eastern Orthodox installment. For Girardians, it provides critique and refinement of many of Girard's most nuanced views and gives due attention to overlooked and controversial aspects of his thought. For the lay reader, the book provides an accessible entry into the spirituality of the Cross through a lens that is both modern and traditional. *Redemption* provides a revitalizing infusion into contemporary Orthodox theological discourse. Its ideas will impact theology in the Orthodox Church and beyond for decades to come and are the basis for a paradigm shift in our understanding of redemption and its practical consequences. The lay reader and professional theologian alike will find novelty and utility in its ideas. *Twentieth-century Literary Criticism* Sharon K. Hall, 1981. Contains alphabetically arranged entries that provide a selection of critical excerpts on the works of thirty authors who lived between 1900 and 1960, each including a biographical critical introduction, a list of principal works, and a bibliographical citation. *Twentieth-century Literary Criticism* Gale Research Company, 1981. Excerpts from criticism of the works of novelists, poets, playwrights, and other creative writers, 1900-1960. *The Monthly Evening Sky Map*, 1933. Five Variations on the Theme of Japanese Painting Léo Bronstein, 1969.
