13 non partisan Pentagon insiders retired military officers and defense specialists lay out an array of hard hitting and well documented charges against our current defense establishment They demonstrate that the hugely expensive and excessively complex weapons embraced by the Pentagon and Congress as vital for our national defense are barely adequate for engaging in outmoded 20th century forms of warfare They are woefully inadequate for fighting a 21st century fourth generation war as we ve learned so painfully in Iraq and Afghanistan At least as disturbing is the condition of the US defense budget Over time policy makers of all political stripes have created budgets that have made our forces smaller less well equipped and less ready to fight all at dramatically increasing cost Fortunately the book s authors offer real world solutions to all the problems they identify At the same time however they remain pessimistic about the prospects for real change arguing that in a system that measures merit by the amount of money spent the reform proposals elaborated in this book are likely to meet intense resistance As Winslow Wheeler remarks The changes require a president with an iron will who will require real not cosmetic reforms of a system determined to and skilled at countering them It will also require a president who will stick with the process for years continuously making decisions that will ultimately reverse the present disastrous course U S national security is now on     **Brassey's D-Day Encyclopedia** Barrett Tillman,2004 Provides a comprehensive reference for everything from the A 20 Havoc bomber to the Zeppelin Plan
