De Havilland A Pictorial Tribute:

De Havilland Gordon Bain,1992 [Air Pictorial](#) ,1995 **International Warbirds** John C. Fredriksen,2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved Invaluable for specialists accessible to enthusiasts International Warbirds An Illustrated Guide to World Military Aircraft 1914 2000 puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World War I to the Balkan conflict including numerous models from Great Britain France Russia and Japan as well as notable machines from Israel Canada China India Brazil and other nations Entries span the history and scope of military aircraft from bombers and fighters to transports trainers reconnaissance craft sea planes and helicopters with each capsule history combining nuts and bolts technical data with the story of that model s evolution and use Together these portraits offer an exciting well researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe and tell a vivid tale of how air power became such a decisive factor in modern warfare **The Mobile Workshop** Clapperton Chakanetsa Mavhunga,2018-06-01 How the presence of the tsetse fly turned the African forest into an open laboratory where African knowledge formed the basis of colonial tsetse control policies The tsetse fly is a pan African insect that bites an infective forest animal and ingests blood filled with invisible parasites which it carries and transmits into cattle and people as it bites them leading to a human animal trypanosomiasis and sleeping sickness In The Mobile Workshop Clapperton Chakanetsa Mavhunga examines how the presence of the tsetse fly turned the forests of Zimbabwe and southern Africa into an open laboratory where African knowledge formed the basis of colonial tsetse control policies He traces the pestiferous work that an indefatigable mobile insect does through its movements and the work done by humans to control it Mavhunga s account restores the central role not just of African labor but of African intellect in the production of knowledge about the tsetse fly He describes how European colonizers built on and beyond this knowledge toward destructive and toxic methods including cutting down entire forests forced prophylactic resettlement massive destruction of wild animals and extensive spraying of organochlorine pesticides Throughout Mavhunga uses African terms to describe the African experience taking vernacular concepts as starting points in writing a narrative of *ruzivo* knowledge rather than viewing Africa through foreign keywords The tsetse fly became a site of knowledge production a mobile workshop of pestilence **Jet Age** Sam Howe Verhovek,2011-08-02 The captivating story of the titans engineers and pilots who raced to design a safe and lucrative passenger jet In Jet Age journalist Sam Howe Verhovek explores the advent of the first generation of jet airliners and the people who designed built and flew them The path to jet travel was triumphal and amazingly rapid less than fifty years after the Wright Brothers first flight at Kitty Hawk Great Britain led the world with the first commercial jet plane service Yet the pioneering British Comet was cursed with a tragic mysterious flaw and an upstart Seattle company put a new competitor in

the sky the Boeing 707 Jet Stratoliner Jet Age vividly recreates the race between two nations two global airlines and two rival teams of brilliant engineers for bragging rights to the first jet service across the Atlantic Ocean in 1958 At the center of this story are great minds and courageous souls including Sir Geoffrey de Havilland who spearheaded the development of the Comet even as two of his sons lost their lives flying earlier models of his aircraft Sir Arnold Hall the brilliant British aerodynamicist tasked with uncovering the Comet's fatal flaw Bill Allen Boeing's deceptively mild mannered president and Alvin Tex Johnston Boeing's swashbuckling but supremely skilled test pilot The extraordinary airplanes themselves emerge as characters in the drama As the Comet and the Boeing 707 go head to head flying twice as fast and high as the propeller planes that preceded them the book captures the electrifying spirit of an era the Jet Age In the spirit of Stephen Ambrose's *Nothing Like It in the World* Verhovek's *Jet Age* offers a gorgeous rendering of an exciting age and fascinating technology that permanently changed our conception of distance and time of a triumph of engineering and design and of a company that took a huge gamble and won

Pioneer Aviators of the World Hart Matthews, 2003 Most people recognize brothers and bicycle mechanics Wilbur and Orville Wright as the first in flight and know that in 1903 on the blustery sand dunes of Kitty Hawk North Carolina they made history with a flying machine of their own invention But few other people know that the next aviator after the Wright brothers a Brazilian flew almost three years later and was nevertheless widely credited as being the first in flight Or that a world famous escapologist a Hungarian made the first flights in Australia but afterwards never flew again Or that in Spain the first public display of a flying machine led to religious riots The first pilots from each of a hundred countries have their stories told in this work A brief biography and description of his or her attempts to fly are provided for each early aviator except in a very few cases where facts are hard to find For purposes of this book a flight is defined as that made by a heavier than air machine capable of taking off from ground level carrying a pilot who controls to some degree the ascent descent and path of the machine To be called successful the flight must be sustained past the point to which the machine's take off momentum would normally carry it through the air
