De La Celula Al Hombre

**Aureliano Maestre de San Juan y
Muñoz**

De La Celula Al Hombre:

El hombre, 1902 **Textura del sistema nervioso del hombre y de los vertebrados** Santiago Ramón y Cajal, 1899
Santiago Ramon y Cajal's *Textura del Sistema Nervioso del Hombre y de los Vertebrados* issued in Madrid from 1899 to 1904 was a comprehensive analysis of all parts of the nervous system in both man and animals and the culmination of fifteen years of research. Cajal proved many of the connections between one section of the brain and another and he illustrated these as well as the many connections one cell makes with others. He described many nerve cells for the first time and also pointed out the plasticity of nerve cells in the brain, a discovery that has only recently come to be appreciated.

Pamphlets on Biology, 1905 *Embriología del hombre y demás vertebrados* Jaime Pujiula, 1923 **La aparición del hombre** Josef H. Reichholf, 2001

Este libro nos cuenta una nueva historia del origen del hombre tal como surge de las recientes investigaciones sobre nuestro patrimonio genético. Una historia que añade rasgos sorprendentes a lo que ya sabemos y echa a rodar muchos mitos. Sabemos ahora con certeza que los seres humanos actuales tienen un origen único y que su primer antecesor femenino procedió de África y debió de tener la piel negra. Sabemos que el hombre salió de su paraíso original africano en tres ramos distintos. Esta nueva historia del hombre se nos explica además dentro de una visión ecológica del pasado que le da pleno sentido.

Cajal's Neuronal Forest Javier DeFelipe PhD, 2017-10-24

Cajal's *Neuronal Forest* Science and Art continues the tradition set forth by its sister volume *Cajal's Butterflies of the Soul* OUP 2009. This new collection contains hundreds of beautiful rarely seen before figures produced throughout the nineteenth century and the beginning of the twentieth century by famed father of modern neuroscience Santiago Ramón y Cajal 1852-1934 and his contemporaries. Cajal was captivated by the beautiful shapes of the cells of the nervous system. He and his fellow scientists saw neurons as trees and glial cells as bushes. Given their high density and arrangement, neurons and glia resembled a thick forest, a seemingly impenetrable terrain of interacting cells mediating cognition and behavior. In unraveling the mysteries of the brain, these researchers encountered an almost infinite number of cellular forms with an extraordinary beauty which they could not help but put pen to paper, allowing them to discover a new artistic world, the neuronal forest, that gave free rein not only to their imagination but to a new way of viewing the brain as well. This book has been divided into two parts. The first focuses on the scientific atmosphere in Cajal's times on the history of the neuron and the anatomical challenge posed in studying neuronal connections. It also delves into the artistic skills of Cajal and other important pioneers in neuroscience and how the neuronal forests have served as an unlimited source of artistic inspiration. The second consists of 275 original drawings by Cajal. All were published over the course of his scientific career and cover virtually all of his research fields of interest, including the spinal cord, the optic lobe and retina, cerebral cortex and many other regions of the brain. *Cajal's Neuronal Forest* Science and Art is a testament to the natural beauty found in science. Despite the common misconception that the drawings of Cajal and other scientists of the time are pieces of art, these drawings are in fact copies of histological preparations and contributed

greatly to the discoveries made in the field of neuroscience This book is a gem in any library whether serving as a medical history or a gallery of stunning sketches *Comentarios Psicológicos Sobre las Enseñanzas de Gurdjieff y Ouspensky.
