

In his mind, he has the power to see the future.
In his hands, he has the power to change it.

Stephen King's

THE DEAD ZONE

When a brilliant, but brilliant, scientist discovers a way to see the future, he must learn to control his powers. In this gripping, suspenseful, and terrifying story, King explores the power of the mind and the power of the future.

Iterative Learning Control for Nonlinear Time-Delay System Jianming Wei,Hong Wang,Fang Liu,2023-01-01 This book focuses on adaptive iterative learning control problem for nonlinear time delay systems A universal adaptive learning control scheme is provided for a wide classes of nonlinear systems with time varying delay and input nonlinearity Proceeding from easy to difficult this book deals with the adaptive iterative learning control problems for parameterized nonlinear time delay systems non parameterized nonlinear time delay systems nonlinear time delay systems with unknown control direction and nonlinear time delay systems with un measurable states The proposed control schemes can be extended to the adaptive learning control problem for wider classes of nonlinear systems revelent to abovementioned nonlinear systems The topics presented in this book are research hot spots of iterative learning control This book will be a valuable reference for researchers and students working or studying in this area

Control Synthesis of Switched Systems Xudong Zhao,Yonggui Kao,Ben Niu,Tingting Wu,2016-11-04 This book offers its readers a detailed overview of the synthesis of switched systems with a focus on switching stabilization and intelligent control The problems investigated are not only previously unsolved theoretically but also of practical importance in many applications voltage conversion naval piloting and navigation and robotics for example The book considers general switched system models and provides more efficient design methods to bring together theory and application more closely than was possible using classical methods It also discusses several different classes of switched systems For general switched linear systems and switched nonlinear systems comprising unstable subsystems it introduces novel ideas such as invariant subspace theory and the time scheduled Lyapunov function method of designing switching signals to stabilize the underlying systems For some typical switched nonlinear systems affected by various complex dynamics the book proposes novel design approaches based on intelligent control concepts It is a useful source of up to date design methods and algorithms for researchers studying switched systems and graduate students of control theory and engineering In addition it is a valuable reference resource for practising engineers working in switched system control design Readers should have a basic knowledge of linear nonlinear and switched systems

Neural Information Processing Tingwen Huang,Zhigang Zeng,Chuangdong Li,Chi Sing Leung,2012-11-05 The five volume set LNCS 7663 LNCS 7664 LNCS 7665 LNCS 7666 and LNCS 7667 constitutes the proceedings of the 19th International Conference on Neural Information Processing ICONIP 2012 held in Doha Qatar in November 2012 The 423 regular session papers presented were carefully reviewed and selected from numerous submissions These papers cover all major topics of theoretical research empirical study and applications of neural information processing research The 5 volumes represent 5 topical sections containing articles on theoretical analysis neural modeling algorithms applications as well as simulation and synthesis

Distributed Fault-Tolerant Consensus Control of Leader-Following Systems Qikun Shen,2023-11-02 This book provides recent theoretical results and applications of the consensus control for nonlinear leader following systems

Combining adaptive control technique fuzzy logic systems neural networks with the other control techniques or approaches this book investigates the consensus control problem of leader following systems and proposes the corresponding control scheme This book intends to provide the readers a good understanding on consensus control based on adaptive control technology This book can serve as a reference for the main research issues and results on nonlinear multi agent systems including leader following systems for researchers devoting to various areas of control theory as well as a material for graduate and undergraduate students interested in nonlinear multi agent systems including leader following systems and their applications Some prerequisites for reading this book include nonlinear system theory matrix theory mathematics basic graph theory and soon

Soil Water Repellency C.J. Ritsema,L.W. Dekker,2012-12-02 It has become clear that soil water repellency is much more wide spread than formerly thought Water repellency has been reported in most continents of the world for varying land uses and climatic conditions Soil water repellency often leads to severe runoff and erosion rapid leaching of surface applied agrichemicals and losses of water and nutrient availability for crops At present no optimum management strategies exist for water repellent soils focusing on minimizing environmental risks while maintaining crop production The book starts with a historical overview of water repellency research followed by seven thematic sections covering 26 research chapters The first section discusses the origin the second the assessment and the third the occurrence and hydrological implications of soil water repellency The fourth section is devoted to the effect of fire on water repellency section five deals with the physics and modeling of flow and transport in water repellent soils section six presents amelioration techniques and farming strategies to combat soil water repellency and section seven concludes the book with an extensive bibliography on soil water repellency

Design Liuping Wang, Hugues Garnier, 2011-10-20 This book is dedicated to Prof Peter Young on his 70th birthday Professor Young has been a pioneer in systems and control and over the past 45 years he has influenced many developments in this field This volume comprises a collection of contributions by leading experts in system identification time series analysis environmetric modelling and control system design modern research in topics that reflect important areas of interest in Professor Young's research career Recent theoretical developments in and relevant applications of these areas are explored treating the various subjects broadly and in depth The authoritative and up to date research presented here will be of interest to academic researcher in control and disciplines related to environmental research particularly those to with water systems The tutorial style in which many of the contributions are composed also makes the book suitable as a source of study material for graduate students in those areas

Hydraulic Modelling A. J. Saul, 1994-03-30 The use of physical models remains an integral part of proving the design of many hydraulic structures often leading to savings in construction costs improved efficiency and safety and avoidance of future operational problems Mathematical models are also essential to the design of new hydraulics particularly for the study of large systems or the effect of a structure on a large system The limitations of mathematical models are continuously decreasing as the power of computers and computational techniques increases however the need for cross validation either from physical models or from field data remains

Devouring Whirlwind Will H Rockett, 1988-11-17 As the popularity of the genre increases and special effects are pushed to greater extremes of terror and cruelty more and more people have begun to wonder what is the attraction of horror films Do they have any socially redeeming features Rockett offers some surprising and provocative answers to these questions in his analysis of the cinema of cruelty First commenting on our fascination with experiences that transcend the world of ordinary reality he looks at film as a means of expressing the dark side of human nature Next he examines the essential ingredients that go into the making of a horror film the variations that are found within the genre and the links between the best horror cinema and Artaud s Theatre of Cruelty Echoing Artaud Rockett argues that human beings are attracted to horror in films because of an unconscious craving for a reality in which the demonic supernatural acts as a living whirlwind devouring the darkness and bringing viewers closer to the transcendence they are actually seeking The final chapter shows how the finest works in the horror genre achieve this underlying aim He discusses filmmakers such as Roman Polanski who have been able to provide the realism and artistic quality that contemporary audiences demand while preserving the ambiguity and terror necessary to experience the power of transcendent force Rockett s skillful and imaginative exploration of the subject will be appreciated by scholars and general readers concerned with popular culture film literature drama and contemporary social issues **Media Review Digest** C.
